## Preface

This manual contains the technical manual for the Clinical Reporting System (CRS) v19.0, which adds fiscal year (FY) 2019 clinical performance measures to existing FY 2002 through FY 2018 measures.

## 1.0 Introduction

This manual provides Indian Health Service (IHS) site managers with a technical description of the Clinical Reporting System (CRS) routines, files, menus, cross references, globals, and other necessary information required to effectively manage the system.

All routines, files, options, and keys have a namespace starting with the letters “BGP.”

The file number range for this package is 90240, 90370–90563, 90530–90539, 90558–90599.

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The IHS GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS CRS is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides technical information for the CRS v19.0. V19.0 adds FY 2018 clinical performance measures to existing FY 2002 through FY 2017 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services (HHS) and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as they want and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were translated into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.

Administrative and clinical users can review individual or all measures at any time to:

- Identify potential data issues in their RPMS; for example, missing or incorrect data.
- Monitor their site's performance against past national performance and upcoming agency goals.
- Identify specific areas where the facility is not meeting the measure in order to initiate business process or other changes.
- Quickly measure impact of process changes on performance measures.
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned.

Users of the RPMS CRS include:

- Area Office and site quality improvement staff
- Compliance officers
- GPRA coordinators
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers
- Area Office directors
- Any staff involved with quality assurance initiatives
- Staff who run the various CRS reports

## 1.1 Key Changes in v19.0

### 1.1.1 Logic Changes to National GPRA/GPRAMA Report Measures

- GPRA Developmental Measures:
  - Added the following new GPRA Developmental measures:
    - Access to Dental Service – Carries Risk Assessment
    - Adult Immunizations – new age ranges for combination measures and new logic for Zoster/Shingrix
    - Suicide Risk Assessment

- Removed the following GPRA Developmental measures:
  - Diabetes: Glycemic Control (moved to GPRA report)
  - Access to Dental Service – patients with dental visit (moved to GPRA report)
  - Access to Dental Service – stainless steel crown measure
  - Cancer Screening: Pap Smear Rates (moved to GPRA report)
  - Cancer Screening: Mammogram Rates (moved to GPRA report)
  - Tobacco Cessation (moved to GPRA report)
- Updated codes and/or logic in the following measures: Diabetes: Blood Pressure Control; Access to Dental Service; Childhood Immunizations; Appropriate Medication Therapy After a Heart Attack; HIV Screening; HIV Quality of Care; Chlamydia Testing; Sexually Transmitted Infection (STI) Screening; Proportion of Days Covered by Medication Therapy; Concurrent Use of Opioids and Benzodiazepines; Use of Benzodiazepine Sedative Hypnotic Medications in the Elderly.
- Diabetes: Glycemic Control:
  - GPRA measure has been changed to Poor Control: A1c > 9.0
  - Removed measure for Active Diabetics with good control.
  - Updated denominators to include patients with DM on the problem list.
- Diabetes: Blood Pressure Control:
  - Updated denominators to include patients with DM on the problem list.
- Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes:
  - Updated denominators to include patients with DM on the problem list.
  - Updated BGP PQA STATIN MEDS medication taxonomy.
- Diabetes: Nephropathy Assessment:
  - Updated denominators to include patients with DM on the problem list.
- Diabetic Retinopathy:
  - Updated denominators to include patients with DM on the problem list.
  - Added CPT codes 92018 and 92019 to other eye exam definition.
- Access to Dental Service:
  - Updated documented dental visit logic.
- Influenza:
  - Updated influenza definition to remove "not documented with" codes associated with POV V04.81.
  - Removed POV V06.6 from influenza definition.

- Adult Immunizations:
  - Updated influenza definition to remove "not documented with" codes associated with POV V04.81.
  - Removed POV V06.6 from influenza definition.
- Childhood Immunizations:
  - Updated GPRAMA measure to GPRA measure.
  - Updated SNOMED subsets to IPC SNOMED subsets.
  - Added SNOMED subsets to encephalopathy, immunodeficiency, HIV, and lymphoreticular cancer definitions.
- Cancer Screening: Pap Smear Rates:
  - Updated numerator to require Pap and HPV in past 5 years to be on the same day.
- Cancer Screening: Mammogram Rates:
  - Updated age range to 52-74.
- Tobacco Use and Exposure Assessment:
  - Removed cessation health factors from Tobacco User/Smoker/Smokeless/ENDS User definitions.
  - Added SNOMED codes to Tobacco Users and Smoker definitions.
  - Added CPT codes G9016, 4000F, 4001F to tobacco screening and tobacco user definitions.
  - Added CPT code G6016 to smoker definition.
- Tobacco Cessation:
  - Updated logic to previous GPRA Dev logic.
  - Updated logic to consider users in cessation as having quit tobacco use.
  - Added CPT code G9016 to tobacco cessation counseling definition.
- Alcohol Screening:
  - Added CPT code G0442 to alcohol screening definition.
- Intimate Partner (Domestic) Violence Screening
  - Updated GPRA measure to GPRAMA measure.
- Depression Screening:
  - Updated GPRAMA measure (patients 18 and older) to GPRA measure.
  - Added measures for Active Diabetic patients (from ONM report).
- Controlling High Blood Pressure - Million Hearts:
  - Removed requirement of HTN POV during report period.
- Statin Therapy for the Prevention and Treatment of Cardiovascular Disease:

- Updated GPRAMA measure to GPRA measure.
- Updated BGP PQA STATIN MEDS medication taxonomy.
- HIV Screening:
  - Added CPT codes 87901, 87906 to HIV Screening definition.

### 1.1.2 Key Logic Changes to Non-GPRA Measures

For key logic changes to non-GPRA measures, please refer to the *CRS 2019 (Version 19.0) Selected Measures Report Performance Measure List and Definitions* document located on the CRS Web site at  
[https://www.ihs.gov/crs/includes/themes/responsive2017/display\\_objects/documents/crsv19/SelectedMeasuresV190.pdf](https://www.ihs.gov/crs/includes/themes/responsive2017/display_objects/documents/crsv19/SelectedMeasuresV190.pdf).

### 1.1.3 Additional Key Enhancements and Revisions

Removed Other National Measures Report.

## 2.0 Implementation and Maintenance

The Clinical Reporting System occupies the BGP namespace. Options, security locks/keys, templates, routines, and globals have the namespace BGP.

**Note:** This version of the CRS (v.19.0) only contains the 2019 files, options, routines, templates, etc. This was done at the request of the verification staff due to the size of this package. V18.1 is a requirement to install v19.0. Please see the technical manual for previous versions for information about all previous versions.

### 2.1 System Requirements

IHS Clinical Reporting System v18.1 must be installed (bgp\_1810.k).

### 2.2 Security Keys

Table 2-1 provides security key information.

Table 2-1: Security key names, descriptive names, and descriptions

Name	Descriptive Name	Description
BGPZAREA	BGP AREA REPORT	This key unlocks the area report options on the main BGPMENU. This key should only be assigned at the Area Office level.
BGPZMENU	BGP MAIN MENU–CRS	This key unlocks the main CRS menu. It should be assigned to all users who need to run GPRA/CRS reports.
BGPZ PATIENT LISTS	BGP PATIENT LISTS	This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should only be given to those users who have a need for such information.
BGPZ SITE PARAMETERS	BGP SITE PARAMETERS	This key should be given to those with authority to update the site parameters.
BGPZ TAXONOMY EDIT	BGP TAXONOMY EDIT	This key should be given only to users who need to update taxonomies.

## 3.0 Routines

This section includes Table 3-1, which lists BGP routines and their descriptions.

Please note that the only routines distributed in v19.0 are the BGPL\* routines. Previous versions of CRS contain the other routines. This was done at the request of the verification staff and is due to the large size of the build.

### 3.1 Routines and Descriptions

Table 3-1 provides a list of routines with comprehensive descriptions of the functions.

Table 3-1: BGP Routines

## 4.0 Files and Tables

### 4.1 File List

Table 4-1 provides information for files and tables. Please note that only files beginning with BGP 19.0 are distributed with v19.0; all previous versions of CRS must be installed prior to v19.0. If v18.1 is installed then all previous versions have been installed.

Table 4-1: BGP File List

<b>File</b>	<b>Global</b>	<b>Filename</b>
90241.01	^BGPCTRL(	BGP CONTROL FILE

## 4.4 Table File

The following six files have over 1,000 fields per file. These files are used to hold calculated data values for the GPRA reports. To conserve space in this document, the table files are not listed here. To generate a listing, use the ^XBFLD or FM data dictionary listing utility to list the data dictionary in detail.

Figure 6-1: External Calls

## 6.2 Callable Routines

Published entry points for use by iCARE:

Routine: BGPLD10

BQI(DFN,BQIGREF) ;PEP–iCare EP

- Description:
  - Entry point called by the iCare module, returns GPRA data by global reference:
    - DFN = Patient internal entry number:
    - BQIGREF = Global reference to store data.

## 6.3 Published Entry Points

**Note:** There are no Published Entry Points for this application.

## 6.4 Exported Options

## 7.0 Security Keys

Table 2-1 provides the BGP security keys and their descriptions.

## 8.0 Archiving and Purging

There is no archiving and purging in this package.

## 9.0 Documentation Resources

This section describes a few methods to generate online technical documentation.

### 9.1 How to Generate Online Documentation

The file number range for this package is 90240, 90370, 90530–90539 and 90558–90599. The namespace is BGP. All templates, routines, screen forms, etc., begin with BGP.

This section describes some methods by which users can generate IHS RPMS CRS technical documentation. Online technical documentation pertaining to the IHS RPMS clinical reporting software can be generated through the use of several kernel options. This is in addition to that which is located in the help prompts and on the help screens throughout the IHS RPMS Clinical Reporting package. These include, but are not limited to, the sections that follow.

### 9.2 System Documentation

Online VPS system documentation can be generated through the use of several kernel options, including:

- %INDEX
- Menu Management
- Inquire Option
- Print Option File
- VA FileMan
- Data Dictionary Utilities
- List File Attributes

For more option listings and further information about other utilities that supply online technical information, see the *Decentralized Hospital Computer Program (DHCP) Kernel Reference* manual.

#### 9.2.1 %INDEX

The **%INDEX** option analyzes the structure of a routine to determine, in part, if the routine adheres to RPMS programming standards. The output can include the following components:

- Compiled list of errors and warnings
- Routine listings

- Local variables
- Global variables
- Naked globals
- Label references
- External references

Running %INDEX for a specified set of routines allows users to discover any existing deviations from RPMS programming standards and to see how routines interact with one another (i.e., which routines call, or are called by, other routines).

To run %INDEX for the IHS RPMS Clinical Reporting package, specify the BGP namespace at the “Routine(s)” prompt.

### 9.2.2 Inquire Option

The **Inquire** menu-management option provides the following information about a specified option:

- Option name
- Menu text
- Option description
- Type of option
- Lock (if any)

In addition, all items on the menu are listed for each menu option. To secure information about IHS RPMS Clinical Reporting options, the BGP namespace must be specified.

### 9.2.3 Print Option File

**Note:** The Print Option File utility generates a listing of options from the Option file (#19). It can print all entries, a single option, or range of options. For a list of IHS RPMS Clinical Reporting options, see Section 9.1.  
There are no Published Entry Points for this application.

### 9.2.4 List File Attributes

This VA FileMan option allows users to generate documentation pertaining to files and file structure. The standard format of this option provides the following data dictionary information for a specified file:

- File name and description

- Identifiers
- Cross-references
- Files pointed to by the specified file
- Files that point to the specified file
- Input, print, and sort templates

In addition, the following applicable data is supplied for each field in the file:

- Field name, number, title, and description
- Global location
- Help prompt
- Cross-references
- Input transform
- Date last edited
- Notes

Using the Global Map format of this option generates an output that lists the following information:

- All cross references for the selected file
- Global location of each field in the file
- Input, print, and sort templates

For a comprehensive listing of CLINICAL files, see Section 4.0.

### 9.3 Online Help

In addition to system documentation, RPMS includes special help displays for most menu options and data entry prompts. Typing a question mark (?) at the Select Option prompt displays information related to the current option. Table 9-1 displays the options available.

Table 9-1: Online Help Options

Typing	Displays
A single question mark (?)	A list of all options accessible from the current option
Two question marks (??)	A list of all accessible options and their formal names
Three question marks (???)	A brief description for each option in a menu
A single question mark (?) followed by an option name ( <b>?OPTION</b> )	Extended help, if available, for that option

## 10.0 SAC Requirements

This program uses a standard global for exporting data to the Area Office. The global is called ^BGPDATA (and is killed at the root level in various routines.)

The kill of these unsubscripted globals has been approved by the Standards and Conventions committee.

# Glossary

## **Archiving**

The storage of historical or little-used data off-line (often on tape.)

## **Cross Reference**

An indexing method whereby files can include presorted lists of entries as part of the stored database. Cross references (x-refs) facilitate look-up and reporting.

## **Entry Point**

A point within a routine that is referenced by a “DO” or “GOTO” command from a routine internal to a package.

## **File**

A set of related records or entries treated as a single unit.

## **FileMan**

The database management system for RPMS.

## **Global**

In MUMPS, global refers to a variable stored on disk (global variable) or the array to which the global variable may belong (global array).

## **INDEX (%INDEX)**

A kernel utility used to verify routines and other MUMPS code associated with a package. Checking is done according to current ANSI MUMPS standards and RPMS programming standards. This tool can be invoked through an option or from direct mode (>D ^%INDEX).

## **Kernel**

The set of MUMPS software utilities that function as an intermediary between the host operating system and application packages, such as Laboratory and Pharmacy. The kernel provides a standard and consistent user and programmer interface between application packages and the underlying MUMPS implementation. These utilities provide the foundation for RPMS.

## **Menu**

A list of choices for computing activity. A menu is a type of option designed to identify a series of items (other options) for presentation to the user for selection. When displayed, menu-type options are preceded by the word “Select” and followed by the word “option,” as in “Select Menu Management option:” (the menu’s **Select** prompt).

**Namespace**

A unique set of 2 to 4 alpha characters that are assigned to a software application by the database administrator.

**Option**

An entry in the Option file. As an item in a menu, an option provides an opportunity for users to select it, thereby invoking the associated computing activity. Options may also be scheduled to run in the background, non-interactively, by TaskMan.

**Routine**

A program or sequence of instructions called by a program that may have some general or frequent use. MUMPS routines are groups of program lines that are saved, loaded, and called as a single unit via a specific name.

**Utility**

A callable routine line tag or function. A universal routine usable by anyone.

**Variable**

A character or group of characters that refers to a value. MUMPS recognizes three types of variables: local variables, global variables, and special variables. Local variables exist in a partition of the main memory and disappear at signoff. A global variable is stored on disk, potentially available to any user. Global variables usually exist as parts of global arrays.

## Acronym List

Acronym	Term Meaning
CRS	Clinical Reporting System
DHCP	Decentralized Hospital Computer Program
ICD	International Classification of Diseases
FIPS	Federal Information Processing Standards
FOIA	Freedom of Information Act
GPRA	Government Performance and Results Act
GPRAMA	GPRA Modernization Act
HHS	(Department of) Health and Human Services
ICD	International Classification of Diseases
IHS	Indian Health Service
ISC	Information System Coordinator
MUMPS	Massachusetts General Hospital (M) Utility Multi Programming System
OIT	Office of Information Technology
RPMS	Resource and Patient Management System
VPS	Volume Performance Standard

## Contact Information
