## Preface

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The Indian Health Service (IHS) GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS Clinical Reporting System (CRS) is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides installation instructions for CRS Version 20.0. Version 20.0 adds fiscal year (FY) 2020 clinical performance measures to existing FY 2002 through FY 2019 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as desired and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were translated into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.

Administrative and clinical users can review individual or all measures at any time to:

- Identify potential data issues in their RPMS, for example, missing or incorrect data.
- Monitor their site's performance against past national performance and upcoming agency goals.

- Identify specific areas where the facility is not meeting the measure to initiate business-process or other changes.
- Quickly measure the impact of process changes on performance measures.
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned.

RPMS CRS Users include:

- Area Office and site quality improvement staff.
- Compliance officers.
- GPRA coordinators.
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers.
- Area Office directors.
- Any staff involved with quality assurance initiatives.
- Staff who run the various CRS reports.

## 1.0 Release Notes

This manual provides user instructions on installing Version 20.0 of the Clinical Reporting System (CRS). The manual provides installation instructions for both the RPMS server-side software and the Visual CRS graphical user interface (GUI).

### 1.1 Key Changes in v20.0

#### 1.1.1 Logic Changes to National GPRA/GPRAMA Report Measures

- GPRA Developmental Measures:
  - Added the following new GPRA Developmental measures:
    - Adult Immunizations – PPSV23/PCV13 combos for high-risk patients and patients 65 and older
    - HIV Screening – User Population patients age 13 through 64 with HIV diagnosis ever and first HIV diagnosis during the report period
    - Hepatitis C Screening – User Population patients age 13 through 64 with Hepatitis C diagnosis ever and first Hepatitis C diagnosis during the report period
  - Removed the following GPRA Developmental measures:
    - Adult Immunizations – combo measures that included one Zoster ever
  - Updated codes and/or logic in the following measures: Access to Dental Service; Adult Immunizations; Adolescent Immunizations; Substance Use Disorder (SUD) in Women of Childbearing Age; Weight Assessment and Counseling for Nutrition and Physical Activity; Physical Activity Assessment; Appropriate Medication Therapy After a Heart Attack; HIV Quality of Care; Hepatitis C Screening; Chlamydia Testing; Proportion of Days Covered by Medication Therapy.
- Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes:
  - Updated breastfeeding definition to include SNOMED data set and Lactation Status of “Lactating” in the Reproductive Factors file.
  - Updated 40 through 75 with DM denominator to only include those with LDL equal to 70 through 189.
  - Updated the ASCVD definition to align more with eCQM measures.
  - Changed select denominator exclusions to denominator exceptions to align with eCQM measures.
  - Updated denominator exceptions to align with eCQM measures.
- Adult Immunizations:

- Added CVX 196 to Td definition.
- Updated age ranges to 19 through 49 and 50 through 64.
- Updated Zoster logic to Zostavax in the past 5 years and the two Shingrix need to be at least 2 months apart.
- Removed PCV13 from Pneumo measures.
- Added PCV13 in the past year as a contraindication to PPSV23.
- Removed several measures.
- Childhood Immunizations:
  - Added CVX 196 to Td definition.
- Tobacco Use and Exposure Assessment:
  - Changed Electronic Nicotine Delivery Systems (ENDS) topic to E-Cigarettes.
  - Removed Current ENDS user health factor and added Current E-cigarette user w/nicotine and Current E-cig user w/other substance(s).
  - Updated ICD-10 codes for patient education logic in Tobacco Screening definition.
  - Updated SNOMED codes for patient education logic in Tobacco Screening definition.
  - Updated SNOMED data sets PXRMBGP TOBACCO SCREENED and PXRMBGP CURRENT TOBACCO.
- Tobacco Cessation:
  - Changed Electronic Nicotine Delivery Systems (ENDS) topic to E-Cigarettes.
  - Removed Current ENDS user health factor and added Current E-cigarette user w/nicotine and Current E-cig user w/other substance(s).
  - Updated SNOMED data set PXRMBGP TOBACCO TOPICS.
  - Updated ICD-10 codes for patient education logic in Tobacco Screening definition.
- Alcohol Screening:
  - Added ICD-10 codes F10.1\*, F10.20, F10.220 through F10.29, F10.920 through F10.982, F10.99, G62.1 to Alcohol-related Patient Education definition.
  - Updated SNOMED codes for Alcohol-related Patient Education definition.
- Screening, Brief Intervention, and Referral to Treatment (SBIRT):
  - Added SNOMED code 408947007 to patient education logic for the BNI definition.
- Intimate Partner (Domestic) Violence Screening (IPV/DV):

- Added ICD-10 codes T74.11XA, T74.21XA, T74.31XA, T74.91XA, T76.11XA, T76.21XA, T76.31XA, T76.91XA, Z91.410 to IPV/DV patient education definition.
- Updated SNOMED codes for IPV/DV patient education definition.
- Depression Screening:
  - Added ICD-10 Z13.3\* to depression screening logic.
- Statin Therapy for the Prevention and Treatment of Cardiovascular Disease:
  - Updated breastfeeding definition to include SNOMED data set and Lactation Status of “Lactating” in Reproductive Factors file.
  - Updated 40 through 75 with DM denominator to only include those with LDL equal to 70 through 189.
  - Updated the ASCVD definition to align more with eCQM measure.
  - Changed select denominator exclusions to denominator exceptions to align with eCQM measure.
  - Updated denominator exceptions to align with eCQM measure.

### 1.1.2 Key Logic Changes to Non-GPRA Measures

For key logic changes to non-GPRA measures, please refer to the *CRS 2020 (Version 20.0) Selected Measures Report Performance Measure List and Definitions* document located on the CRS website:

[https://www.ihs.gov/sites/crs/themes/responsive2017/display\\_objects/documents/crsv20/SelectedMeasuresV200.pdf](https://www.ihs.gov/sites/crs/themes/responsive2017/display_objects/documents/crsv20/SelectedMeasuresV200.pdf).

### 1.1.3 Additional Key Enhancements and Revisions

- Removed Patient Education Reports and moved some measures to the Selected Measures Report.
- Updated the following Improving Patient Care (IPC) measures: Diabetes Comprehensive Care, Adolescent Immunizations, Adult Immunizations.

## 2.0 Installation Notes

**Note:** Read the entire Notes file prior to attempting any installation.

**Prefix:** BGP

**Current Version:** 20.0

**Note:** This distribution of the CRS contains Version 20.0 of CRS and the GUI front end to the CRS system. The server-side (i.e., “roll-and-scroll” or backend) version 20.0 of the package can be installed alone or with both the GUI and the server-side versions. Currently, there is no requirement to install the GUI.

Please install version 20.0 of CRS (bgp\_2000.k) at all sites regardless of whether the site opts to install and use the GUI portion of the package. Version 20.0 of CRS and the GUI have different requirements; please take note of the requirements section for each piece of the software.

### 2.1 CRS Distribution Contents and Required Resources

### 2.2 Contents of Distribution

Table 2-1: Contents of Distribution

File	Description
bgp_2000.k	Kernel Installation and Distribution System (KIDS) file containing software
bgp_200i.pdf	Installation guide in PDF format (this manual)
bgp_200t.pdf	Technical Manual in PDF format
bgp_200u.pdf	User Manual in PDF format
bgp_200u_visual.pdf	Visual CRS User Manual in PDF format
bgp_2000client.zip	Visual CRS software for Client's PC

#### 2.2.1 Required Resources

- Kernel v8.0 patch 1018 (XU\*8.0\*1018) or later
- FileMan v22.0 patch 1018 (DI\*22.0\*1018) or later

- Taxonomy v5.1 patch 32 must be installed (atx\_0510.32k)
- IHS Clinical Reporting System version 19.1 through patch 3 must be installed (bgp\_1910.03k).

## 2.3 Visual CRS (GUI) Distribution Contents and Required Resources

### 2.3.1 Contents of GUI CRS Distribution

- bgp\_2000client.zip.

The following two files are contained in the zip file:

- bgp\_2000setup.exe.
- bgp\_2000.msi.

### 2.3.2 Required Resources for GUI CRS

Additional requirements for installing and using Visual CRS on a client's PC:

- *On the RPMS Server:*
  - BMX v4.0.
  - IHS Clinical Reporting System v20.0.
- *On the Client (User's) PC:*
  - Windows XP Service Pack 3 or higher.
  - Microsoft Office 2003 or later.
  - .NET Framework v4.0.

**Notes:** If the CRS GUI will not be installed, ignore these requirements.

If the .NET Framework v4.0 is not installed, it will automatically be downloaded and installed when the client installation is started.

## 2.4 Before You Begin: Installation Issues

1. Make a copy of this distribution for offline storage.
2. Print all notes/readme files.
3. Create a printed audit trail, in case there are any problems with the installation.

To capture terminal output during the installation, use an auxport printer attached to the terminal on which the installation is being performed.

### 3.0 Installation Instructions

**Note:** This installation is a KIDS install. For any questions on how to do a KIDS installation, please contact your Area Office information systems support personnel.

In all UCIs running the IHS CRS:

1. Ensure that users are unable to use the CRS for the duration of this installation.
2. Save all routines (^%RO (CACHE) in the BGPO\* namespace for use in returning to the prior existing version, if needed.

**Note:** If no problems are noted with the new installation, remove saved routines from your system seven to ten days after this install.

3. Install **bgp\_2000.k**. This is the KIDS file for the IHS CRS:
  - a. Load the distribution into KIDS using **Option 1** on the **KIDS Installation menu**. The distribution was released in a file named **bgp\_2000.k**.
  - b. Verify the load using **Option 2** on the **KIDS Installation** menu.
  - c. Consider using **Options 3** and **4** on the **KIDS Installation** menu to print and compare the Transport global.
  - d. Install the distribution using **Option 6** on the **Installation** menu.
  - e. To see results, use the **KIDS Install File Print** option to view/print the IHS CLINICAL REPORTING SYSTEM V20.0 entry.

**Note:** For assistance with a KIDS install, call the Area Office support personnel.

4. After the install completes, assign security keys, as appropriate, using Table 3-1.

Table 3-1: Assigning security keys

Name	Descriptive Name	Description
BGPZAREA	BGP Area Report	This key unlocks the Area Office report options on the main BGPMENU. Note: This key should be assigned <i>only</i> at the Area Office level.
BGPZMENU	BGP Main Menu–CRS	This key unlocks the main CRS menu. It should be assigned to all users who need to run GPRA/CRS reports.

Name	Descriptive Name	Description
BGPZ PATIENT LISTS	BGP Patient Lists	This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should be given <i>only</i> to those users who have a need for such information.
BGPZ SITE PARAMETERS	BGP Site Parameters	This key should be given to those with authority to update the site parameters.
BGPZ TAXONOMY EDIT	BGP Taxonomy Edit	This key should be given <i>only</i> to users who will need to update taxonomies.

## 3.1 Installation of the CRS GUI

There are two parts to the CRS GUI install: installation on the RPMS server and installation on the local (client) PC. See the steps below for installation instructions.

### 3.1.1 Installation on the RPMS Server

1. Make sure BMX v4.0 is installed in RPMS on the RPMS Server.
2. Make sure CRS v20.0 is installed in RPMS on the RPMS server. (See instructions above.)

**Note:** If a previous version of Visual CRS is being used you will not need to perform Steps 3 and 4. If this is the first time Visual CRS is being used, perform Steps 3 and 4.

3. Assign option **BGPGRPC** as a secondary menu option with a synonym of **BGPG** for each user.
4. Assign option **BMXRPC** as a secondary menu option with a synonym of **BMX** for each user.

### 3.1.2 Installation on Each User's (Client) PC

1. Place **bgp\_2000client.zip** into a directory of your choice and unzip the file. There are two files included in the zip file: **bgp\_2000.msi** and **bgp\_2000setup.exe**.
2. Double-click the **bgp\_2000setup.exe** file that was distributed with Visual CRS. If asked, accept the License Agreement and follow the instructions for downloading and installing Microsoft .Net Framework v4.0. This will only occur if the most current version of Microsoft.Net Framework v4.0 is not on the local PC. This step takes approximately 20–30 minutes over a DSL connection.

3. Follow the prompts on the **Visual CRS Setup** screens and accept all of the defaults.
4. Double-click the **Visual CRS** shortcut that displays on the desktop.
5. If this is the first install, a new connection must be added. Please refer to the *BMX 4.0 User Manual* for instructions.
6. When the **RPMS Login** window displays, enter the RPMS access and verify codes and click **OK**.
7. If data for multiple facilities is stored on the same RPMS database, the **Select Division** window displays. Select a Division and click **OK**.
8. You are now running the Visual CRS software.

## 4.0 Sample Installations

### 4.1 Sample Installation of CRS on RPMS Server

```
CMBB>D ^XPKRN

KIDS 8.0

Select KIDS OPTION: 1  LOAD A DISTRIBUTION
Enter a Host File: D:\export\bgp_2000.k

KIDS Distribution saved on Jan 08, 2020@11:31
Comment: crs v20.0

This Distribution contains Transport Globals for the following Package(s):
Build IHS CLINICAL REPORTING 20.0 has been loaded before, here is when:
      IHS CLINICAL REPORTING 20.0   Install Completed
                                   was loaded on Oct 07, 2019@09:34:02
      OK to continue with Load? NO// y  YES

Distribution OK!

Want to Continue with Load? YES//
Loading Distribution...

Build IHS CLINICAL REPORTING 20.0 has an Environmental Check Routine
Want to RUN the Environment Check Routine? YES//
      IHS CLINICAL REPORTING 20.0
Will first run the Environment Check Routine, BGPOPOS

Use INSTALL NAME: IHS CLINICAL REPORTING 20.0 to install this Distribution.

Install Completed
```

Figure 4-1: Sample installation for IHS Clinical Reporting package 20.0

## 4.2 Sample Installation of the CRS GUI

1. Double-click **bgp\_2000setup.exe** to launch the **Visual CRS Setup Wizard**.
2. The **Visual CRS Setup Wizard** dialog displays (Figure 4-2).

Figure 4-2: Visual CRS Setup Wizard, Welcome dialog

- Click **Next** on the Setup Wizard dialog to display the **Select Installation Folder** dialog. See Figure 4-3.

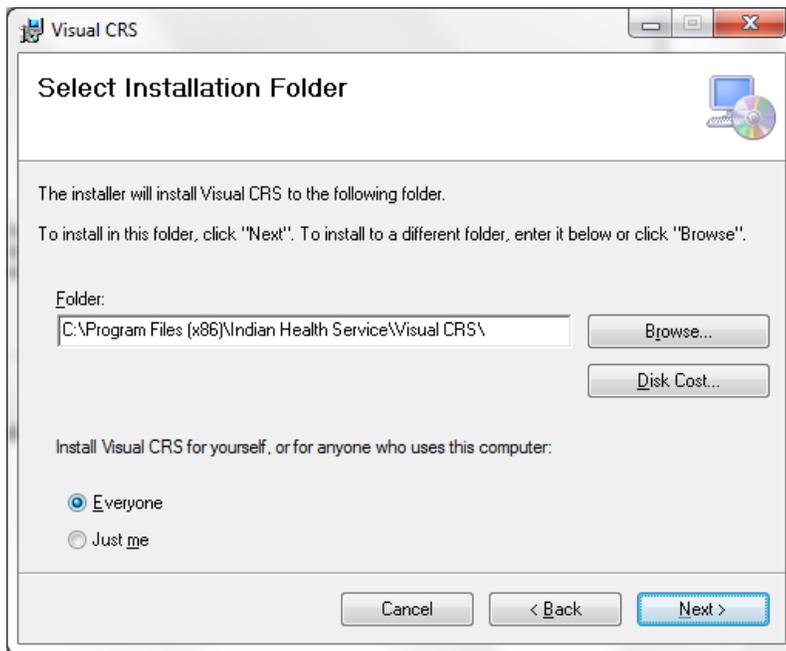

Figure 4-3: Visual CRS Setup Wizard, Select Installation Folder dialog

- Click **Next** to display the **Confirm Installation** dialog. See Figure 4-4.

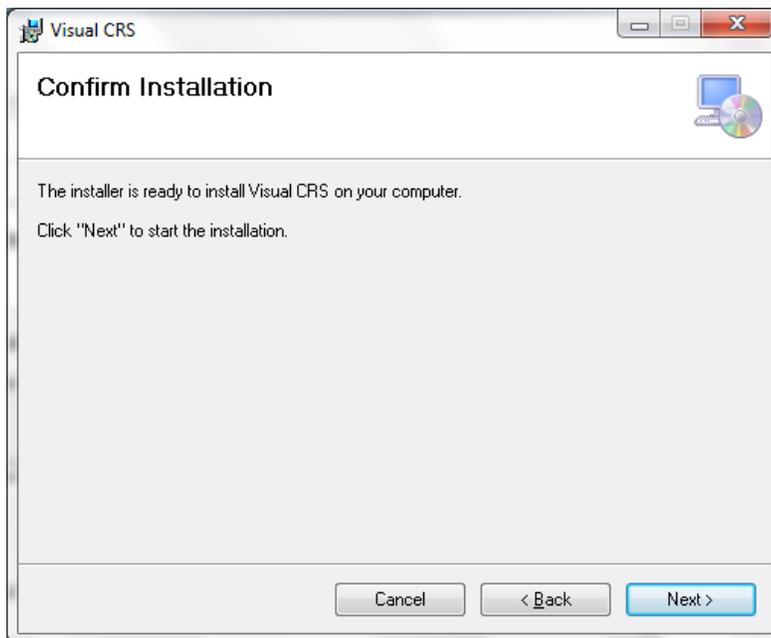

Figure 4-4: Visual CRS Setup Wizard, Confirm Installation dialog

5. Click **Next** to display the **Installing Visual CRS** dialog. See Figure 4-5.

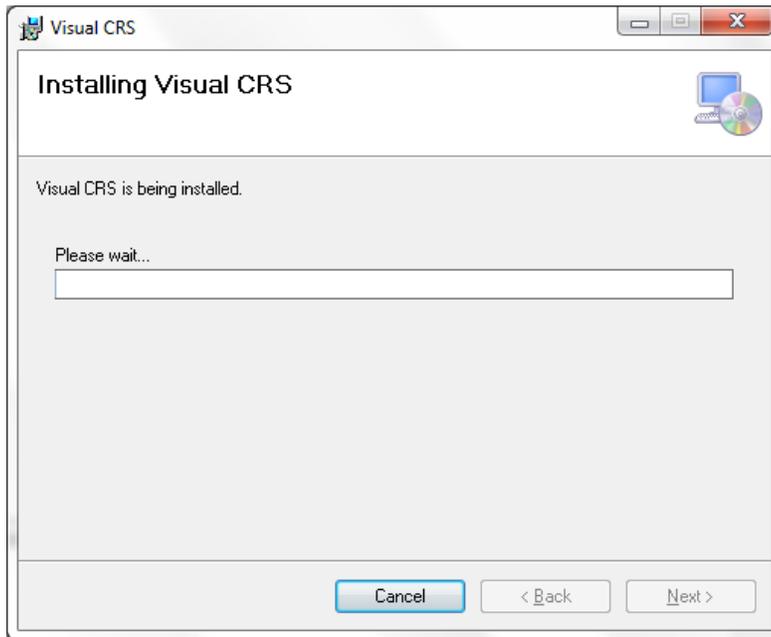

Figure 4-5: Visual CRS Setup Wizard, Installing Visual CRS dialog

6. Wait while the application installs. When the installation is complete, the **Installation Complete** dialog displays. See Figure 4-6.

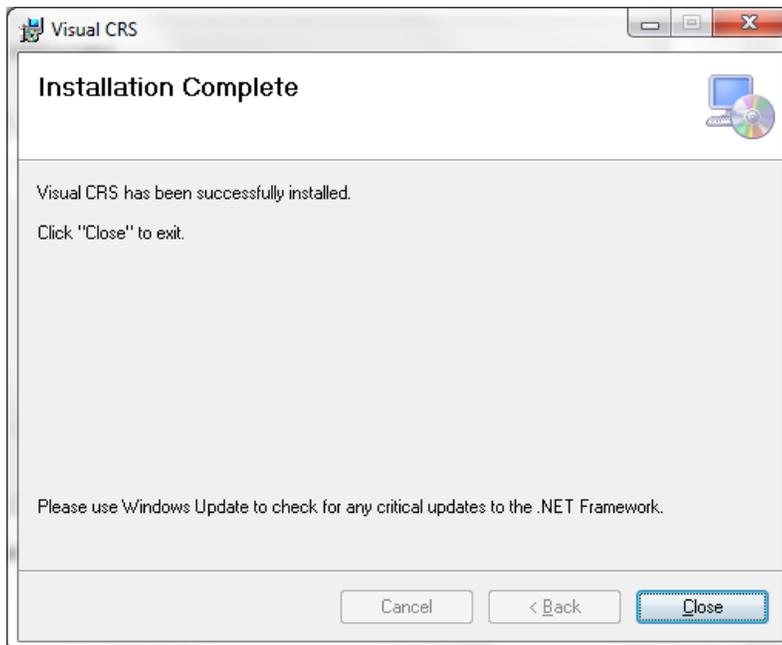

Figure 4-6: Visual CRS Setup Wizard, Installation Complete dialog

7. Click **Close**.

A desktop shortcut named Visual CRS should now be available. Refer to the user manual for instructions on use of the Visual CRS application.

## 5.0 Installation Configuration

The requirements for successful installation are listed in sections 2.2.1 (KIDS build) and 2.3.2 (GUI install). There are no other reference materials other than this install manual.

## Acronym List

Acronym	Definition
ASCVD	Atherosclerotic Cardiovascular Disease
BNI	Brief Negotiated Interview
CPT	Current Procedural Terminology
CRS	Clinical Reporting System
eCQM	Electronic Clinical Quality Measures
ENDS	Electronic Nicotine Delivery Systems
FY	Fiscal Year
GPRA	Government Performance and Results Act
GPRAMA	GPRA Modernization Act
GUI	Graphical User Interface
HEDIS	Healthcare Effectiveness Data and Information Set
HIV	Human Immunodeficiency Virus
ICD	International Classification of Diseases
IHS	Indian Health Service
IPC	Improving Patient Care
IPV/DV	Intimate Partner (Domestic) Violence Screening
KIDS	Kernel Installation and Distribution System
LDL	Low-Density Lipoprotein
RPMS	Resource and Patient Management System
SBIRT	Screening, Brief Intervention, and Referral to Treatment
SNOMED	Systematized Nomenclature of Medicine
SUD	Substance Use Disorder
UCI	Unique Client Identifier
