## Revision History

Version	Date	Author	Section	Page Number	Summary of Change
1.0	August 2005	Lori Butcher			Initial version
8.0	August 2008	Lori Butcher			Updated to include changes to the logic descriptions and performance measures for FY 2008 and reformatted
9.0	June 2009	Lori Butcher			Updated for version 9.0
10.0	May 2010	Lori Butcher			Updated for version 10.0
11.0	January 2011	Lori Butcher			Updated for version 11.0
11.1	May 2011	Lori Butcher			Updated for version 11.1
12.0	December 2011	Lori Butcher			Updated for version 12.0
12.1	April 2012	Lori Butcher			Updated for version 12.1
13.0	November 2012	Lori Butcher			Updated for version 13.0
14.0	November 2013	Lori Butcher			Updated for version 14.0
14.1	May 2014	Lori Butcher			Updated for version 14.1
15.0	November 2014	Lori Butcher			Updated for version 15.0
15.1	May 2015	Lori Butcher			Updated for version 15.1
16.0	November 2015	Lori Butcher			Updated for version 16.0
16.1	February 2016	Lori Butcher			Updated for version 16.1
17.0	September 2016	Lori Butcher			Updated for version 17.0
17.1	March 2017	Lori Butcher			Updated for version 17.1
18.0	October 2017	Lori Butcher			Updated for version 18.0

<b>Version</b>	<b>Date</b>	<b>Author</b>	<b>Section</b>	<b>Page Number</b>	<b>Summary of Change</b>
18.1	June 2018	Lori Butcher			Updated for version 18.1
19.0	December 2019	Lori Butcher			Updated for version 19.0
19.1	May 2019	Lori Butcher			Updated for version 19.1
20.0	March 2020	Lori Butcher			Updated for version 20.0
20.1	May 2020	Lori Butcher			Updated for version 20.1
21.0	November 2020	Lori Butcher			Updated for version 21.0
21.1	May 2021	Lori Butcher			Updated for version 21.1
22.0	November 2021	Lori Butcher			Updated for version 22.0
22.1	May 2022	Lori Butcher			Updated for version 22.1
23.0	November 2022	Lori Butcher			Updated for version 23.0

## Preface

This manual contains the technical manual for the Clinical Reporting System (CRS) v23.0, which adds fiscal year (FY) 2023 clinical performance measures to existing FY 2002 through FY 2022 measures.

## 1.0 Introduction

This manual provides Indian Health Service (IHS) site managers with a technical description of the Clinical Reporting System (CRS) routines, files, menus, cross references, globals, and other necessary information required to effectively manage the system.

All routines, files, options, and keys have a namespace starting with the letters “BGP.”

The file number range for this package is 90240, 90370–90565, 90530–90539, and 90558–90599.

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The IHS GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS CRS is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides technical information for the CRS v23.0. Version 23.0 adds FY 2022 clinical performance measures to existing FY 2002 through FY 2021 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services (HHS) and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as they want and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were translated into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.

Administrative and clinical users can review individual or all measures at any time to:

- Identify potential data issues in their RPMS; for example, missing or incorrect data.
- Monitor their site's performance against past national performance and upcoming agency goals.
- Identify specific areas where the facility is not meeting the measure in order to initiate business process or other changes.
- Quickly measure impact of process changes on performance measures.
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned.

Users of the RPMS CRS include:

- Area Office and site quality improvement staff
- Compliance officers
- GPRA coordinators
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers
- Area Office directors
- Any staff involved with quality assurance initiatives
- Staff who run the various CRS reports

## 1.1 Key Changes in v23.0

### 1.1.1 Logic Changes to National GPRA/GPRAMA Report Measures

- GPRA Developmental Measures:
  - Added the following GPRA Developmental topic:
    - Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes
  - Removed the following GPRA Developmental topic:
    - Diabetes: Blood Pressure Control

- Screening, Brief Intervention, and Referral to Treatment (SBIRT)
  - Removed measures from Adult Immunizations topic and moved to GPRA report.
  - Updated codes and/or logic in the following topics: Childhood Immunizations; Suicide Risk Assessment; Appropriate Medication Therapy after a Heart Attack; HIV Screening; HIV Quality of Care; Sexually Transmitted Infection (STI) Screening; Proportion of Days Covered by Medication Therapy; Concurrent Use of Opioids and Benzodiazepines.
- Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes:
  - Removed POV E78.00 from hypercholesterolemia definition.
  - Changed ASCVD definition to an active diagnosis or an ASCVD procedure ever.
  - Removed pregnancy as a denominator exclusion.
  - Added denominator exception for patients with documentation of a medical reason for not being prescribed statin therapy.
  - Updated hospice indicator and palliative care definitions.
  - Updated medication taxonomy BGP PQA STATIN MEDS.
- Influenza:
  - Changed measure for patients 18 years and older to GPRAMA.
- Adult Immunizations:
  - Updated age ranges.
  - Updated pneumococcal measures and logic to match previous GPRA Developmental measures.
  - Removed Zostavax vaccine from logic and measures.
- Childhood Immunizations:
  - Removed POV codes 042.0 through 044.9 and R75 from HIV definition.
- Cancer Screening: Mammogram Rates:
  - Added POV code Z12.31 and CPT codes 77061 through 77063 and G0279 to mammogram definition.
- Screening, Brief Intervention, and Referral to Treatment (SBIRT)
  - Updated measures to include telemedicine visits (previous GPRA Developmental logic).
- Statin Therapy for the Prevention and Treatment of Cardiovascular Disease:
  - Removed POV E78.00 from hypercholesterolemia definition.
  - Changed ASCVD definition to an active diagnosis or an ASCVD procedure ever.
  - Removed pregnancy as a denominator exclusion.

- Added denominator exception for patients with documentation of a medical reason for not being prescribed statin therapy.
- Updated hospice indicator and palliative care definitions.
- Updated medication taxonomy BGP PQA STATIN MEDS.
- HIV Screening
  - Removed POV codes 042.0 through 044.9 and R75 from HIV definition.

### 1.1.2 Key Logic Changes to Non-GPRA Measures

For key logic changes to non-GPRA measures, please refer to the *CRS 2023 (Version 23.0) Selected Measures Report Performance Measure List and Definitions* document located on the CRS website:

[https://www.ihs.gov/sites/crs/themes/responsive2017/display\\_objects/documents/crsv23/SelectedMeasuresV230.pdf](https://www.ihs.gov/sites/crs/themes/responsive2017/display_objects/documents/crsv23/SelectedMeasuresV230.pdf)

### 1.1.3 Additional Key Enhancements and Revisions

- None.

## 2.0 Implementation and Maintenance

The Clinical Reporting System occupies the BGP namespace. Options, security locks/keys, templates, routines, and globals have the namespace BGP.

**Note:** This version of the CRS (v23.0) only contains the 2022 files, options, routines, templates, etc. This was done at the request of the verification staff due to the size of this package. V22.1 is a requirement to install v23.0. Please see the technical manual for previous versions for information about all previous versions.

### 2.1 System Requirements

- Kernel v8.0 patch 1018 (XU\*8.0\*1018) or later
- FileMan v22.0 patch 1018 (DI\*22.0\*1018) or later
- Taxonomy v5.1 patch 45 or later must be installed (atx\_0510.45k, atx\*5.1\*45)
- IHS Clinical Reporting System version 22.1 must be installed (bgp\_2210.k).

### 2.2 Security Keys

Table 2-1 provides security key information.

Table 2-1: Security key names, descriptive names, and descriptions

Name	Descriptive Name	Description
BGPZAREA	BGP AREA REPORT	This key unlocks the area report options on the main BGPMENU. This key should only be assigned at the Area Office level.
BGPZMENU	BGP MAIN MENU – GPRA	This key unlocks the main CRS menu. It should be assigned to all users who need to run GPRA/CRS reports.
BGPZ PATIENT LISTS	BGP PATIENT LISTS	This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should only be given to those users who have a need for such information.
BGPZ SITE PARAMETERS	BGP SITE PARAMETERS	This key should be given to those with authority to update the site parameters.

---

<b>Name</b>	<b>Descriptive Name</b>	<b>Description</b>
BGPZ TAXONOMY EDIT	BGP TAXONOMY EDIT	This key should be given only to users who need to update taxonomies.

## 3.0 Routines

This section includes Table 3-1, which lists BGP routines and their descriptions.

Please note that the only routines distributed in v23.0 are the BGPP\* and BGPX\* routines. Previous versions of CRS contain the other routines. This was done at the request of the verification staff and is due to the large size of the build.

### 3.1 Routines with Description

Table 3-1 provides a list of routines with comprehensive descriptions of the functions.

Table 3-1: BGP routines

## 4.0 Files and Tables

### 4.1 File List

Table 4-1 provides information for files and tables. Please note that only files beginning with BGP 23 are distributed with v23.0; all previous versions of CRS must be installed prior to v23.0. If v22.1 is installed, then all previous versions have been installed.

Table 4-1: BGP file list

File (#)	Global	Filename
90241.01	^BGPCTRL(	BGP CONTROL FILE

## 4.4 Table File

The following six files have over 1,000 fields per file. These files are used to hold calculated data values for the GPR reports. To conserve space in this document, the table files are not listed here. To generate a listing, use the ^XBFLD or FM data dictionary listing utility to list the data dictionary in detail.

**FILE:** 90567.03 BGP 23 DATA CURRENT

Figure 5-1: External Calls

## 5.2 Callable Routines

Published entry points for use by iCARE:

Routine: BGPPD10

BQI(DFN,BQIGREF) ;PEP–iCare EP

- Description:
  - Entry point called by the iCare module, returns GPRA data by global reference:
    - DFN = Patient internal entry number:
      - BQIGREF = Global reference to store data.

## 5.3 Published Entry Points

**Note:** There are no published entry points for this application.

## 5.4 Exported Options

Table 5-1: Exported BGP options

Option Name	Description	KEY

BGPMENU	IHS Clinical Reporting System (CRS) Main Menu	BGPZMENU

## 6.0 Internal Relations

All users should be given the access to the appropriate options and keys, as needed.  
All options in this system stand alone.

## 7.0 Security Keys

Table 2-1 provides the BGP security keys and their descriptions.

## 8.0 Archiving and Purging

There is no archiving and purging in this package.

## 9.0 Documentation Resources

This section describes a few methods to generate online technical documentation.

### 9.1 How to Generate Online Documentation

The file number range for this package is 90240, 90370, 90530–90539, and 90558–90599. The namespace is BGP. All templates, routines, screen forms, etc., begin with BGP.

This section describes some methods by which users can generate IHS RPMS CRS technical documentation. Online technical documentation pertaining to the IHS RPMS clinical reporting software can be generated through the use of several kernel options. This access is in addition to that which is located in the help prompts, and on the help screens throughout the IHS RPMS Clinical Reporting package. These include, but are not limited to, the sections that follow.

### 9.2 System Documentation

Online Volume Performance Standard (VPS) system documentation can be generated through the use of several kernel options, including:

- %INDEX
- Menu Management
- Inquire Option
- Print Option File
- VA FileMan
- Data Dictionary Utilities
- List File Attributes

For more option listings and further information about other utilities that supply online technical information, see the *Decentralized Hospital Computer Program (DHCP) Kernel Reference* manual.

#### 9.2.1 %INDEX

The %INDEX option analyzes the structure of a routine to determine in part, if the routine adheres to RPMS programming standards. The output can include the following components:

- Compiled list of errors and warnings
- Routine listings
- Local variables

- Global variables
- Naked globals
- Label references
- External references

Running %INDEX for a specified set of routines allows users to discover any existing deviations from RPMS programming standards and to see how routines interact with one another (i.e., which routines call, or are called by, other routines).

To run %INDEX for the IHS RPMS Clinical Reporting package, specify the **BGP** namespace at the “Routine(s)” prompt.

### 9.2.2 Inquire Option

The Inquire menu management option provides the following information about a specified option:

- Option name
- Menu text
- Option description
- Type of option
- Lock (if any)

In addition, all items on the menu are listed for each menu option. To secure information about IHS RPMS Clinical Reporting options, the BGP namespace must be specified.

### 9.2.3 Print Option File

**Note:** The Print Option File utility generates a listing of options from the Option file (#19). It can print all entries, a single option, or range of options. For a list of IHS RPMS Clinical Reporting options, see Section 9.1.

There are no published entry points for this application.

### 9.2.4 List File Attributes

This VA FileMan option allows users to generate documentation pertaining to files and file structure. The standard format of this option provides the following data dictionary information for a specified file:

- File name and description
- Identifiers

- Cross-references
- Files pointed to by the specified file
- Files that point to the specified file
- Input, print, and sort templates

In addition, the following applicable data is supplied for each field in the file:

- Field name, number, title, and description
- Global location
- Help prompt
- Cross-references
- Input transform
- Date last edited
- Notes

Using the Global Map format of this option generates an output that lists the following information:

- All cross-references for the selected file
- Global location of each field in the file
- Input, print, and sort templates

For a comprehensive listing of files, see Table 4-1 in Section 4.1.

## 9.3 Online Help

In addition to system documentation, RPMS includes special help displays for most menu options and data entry prompts. Typing a question mark (?) at the “Select Option” prompt displays information related to the current option. Table 9-1 displays the available options.

Table 9-1: Online help options

Typing	Displays
A single question mark (?)	A list of all options accessible from the current option
Two question marks (??)	A list of all accessible options and their formal names
Three question marks (???)	A brief description for each option in a menu
A single question mark (?) followed by an option name (?OPTION)	Extended help, if available, for that option

## 10.0 SAC Requirements and Exemptions

This program uses a standard global for exporting data to the Area Office. The global is called ^BGPDATA (and is killed at the root level in various routines).

The kill of these unsubscribed globals has been approved by the Standards and Conventions committee.

# Glossary

## Archiving

The storage of historical or little-used data off-line (often on tape.)

## Cross-Reference

An indexing method whereby files can include presorted lists of entries as part of the stored database. Cross-references (x-refs) facilitate look-up and reporting.

## Entry Point

A point within a routine that is referenced by a “DO” or “GOTO” command from a routine internal to a package.

## File

A set of related records or entries treated as a single unit.

## FileMan

The database management system for RPMS.

## Global

In MUMPS, global refers to a variable stored on disk (global variable) or the array to which the global variable may belong (global array).

## INDEX (%INDEX)

A kernel utility used to verify routines and other MUMPS code associated with a package. Checking is done according to current ANSI MUMPS standards and RPMS programming standards. This tool can be invoked through an option or from direct mode (>D ^%INDEX).

## Kernel

The set of MUMPS software utilities that function as an intermediary between the host operating system and application packages, such as Laboratory and Pharmacy. The kernel provides a standard and consistent user and programmer interface between application packages and the underlying MUMPS implementation. These utilities provide the foundation for RPMS.

## Menu

A list of choices for computing activity. A menu is a type of option designed to identify a series of items (other options) for presentation to the user for selection. When displayed, menu-type options are preceded by the word “Select” and followed by the word “option,” as in “Select Menu Management option:” (the menu’s Select prompt).

**Namespace**

A unique set of two to four alpha characters that are assigned to a software application by the database administrator.

**Option**

An entry in the Option file. As an item in a menu, an option provides an opportunity for users to select it, thereby invoking the associated computing activity. Options may also be scheduled to run in the background, non-interactively, by TaskMan.

**Routine**

A program or sequence of instructions called by a program that may have some general or frequent use. MUMPS routines are groups of program lines that are saved, loaded, and called as a single unit via a specific name.

**Utility**

A callable routine line tag or function. A universal routine usable by anyone.

**Variable**

A character or group of characters that refers to a value. MUMPS recognizes three types of variables: local variables, global variables, and special variables. Local variables exist in a partition of the main memory and disappear at signoff. A global variable is stored on disk, potentially available to any user. Global variables usually exist as parts of global arrays.

## Acronym List

Acronym	Term Meaning
ADA	American Dental Association
CRS	Clinical Reporting System
DHCP	Decentralized Hospital Computer Program
ENDS	Electronic Nicotine Delivery System
FY	Fiscal Year
GPRA	Government Performance and Results Act
GPRAMA	GPRA Modernization Act
HHS	(Department of) Health and Human Services
ICD	International Classification of Diseases
IHS	Indian Health Service
MUMPS	Massachusetts General Hospital (M) Utility Multi Programming System
OIT	Office of Information Technology
PPN	Patient Preferred Name
RPMS	Resource and Patient Management System
SAC	Standards and Conventions
SBIRT	Screening, Brief Intervention and Referral to Treatment
SUD	Substance Use Disorder
VA	Department of Veterans Affairs
VPS	Volume Performance Standard

## Contact Information

If you have any questions or comments regarding this distribution, please contact the IHS IT Service Desk.
