Preface

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The Indian Health Service (IHS) GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS Clinical Reporting System (CRS) is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides installation instructions for CRS v25.0. v25.0 adds fiscal year (FY) 2025 clinical performance measures to existing FY 2002 through FY 2024 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as desired and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were translated into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.

Administrative and clinical users can review individual or all measures at any time to:

- Identify potential data issues in their RPMS, for example, missing or incorrect data.
- Monitor their site's performance against past national performance and upcoming agency goals.
- Identify specific areas where the facility is not meeting the measure to initiate business-process or other changes.
- Quickly measure the impact of process changes on performance measures.
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned.

RPMS CRS Users include:

- Area Office and site quality improvement staff.
- Compliance officers.
- GPRA coordinators.
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers.
- Area Office directors.
- Any staff involved with quality assurance initiatives.
- Staff who run the various CRS reports.

1.0 Release Notes

This manual provides user instructions on installing v25.0 of the Clinical Reporting System (CRS). The manual provides installation instructions for both the RPMS server-side software and the Visual CRS graphical user interface (GUI).

1.1 Key Changes in v25.0

1.1.1 Logic Changes to National GPRA/GPRAMA Report Measures

- GPRA Developmental Measures:
 - Updated codes and/or logic in the following topics: Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes; Adult Immunizations.
- Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes:
 - Active diagnosis of ASCVD updated to any time prior to the end of the report period.
- Adult Immunizations:
 - Added PCV21 to Pneumococcal definition.
- Childhood Immunizations:
 - Added PCV21 to Pneumococcal definition.
 - Added LOINC codes 104170-6, 104132-6 to BGP HPV LOINC CODES.
 - Added LOINC code 104132-6 to BGP HPV PRIMARY LOINC CODES.
- Intimate Partner (Domestic) Violence Screening:
 - Updated code and/or logic to IPV/DV Related Diagnosis definition.
- Statin Therapy for the Prevention and Treatment of Cardiovascular Disease:
 - Active diagnosis of ASCVD updated to any time prior to the end of the report period.

1.1.2 Key Logic Changes to Non-GPRA Measures

For key logic changes to non-GPRA measures, please refer to the *CRS 2025 (Version 25.0) Selected Measures Report Performance Measure List and Definitions* document located on the CRS website:

<https://www.ihs.gov/crs/software/fy24/>

1.1.3 Additional Key Enhancements and Revisions

- Automated GPRA Report:
 - Removed Automated GPRA Report functionality.
- Test/Production Flag:
 - Added new flag to help ensure data from a test database is not uploaded to production

1.1.4 Feature Numbers Included in Release

- 111180–Update Manuals - v25.0
- 111183–CRS Routine Updates - v25.0
- 111633–CRS v25.0 Code Updates
- 111862–Statin Therapy measure updates
- 112210–New Elder Care DM BP measure
- 112211–Add Test/Prod Flag to identify files
- 117104–Remove Automated GPRA Report functionality
- 119841–BGP: Updates based on EO

2.0 Installation Notes

Note: Read the entire Notes file prior to attempting any installation.

Prefix: BGP

Current Version: 25.0

Note: This distribution of the CRS contains v25.0 of CRS and the GUI front end to the CRS system. The server-side (i.e., “roll-and-scroll” or backend) v25.0 of the package can be installed alone or with both the GUI and the server-side versions. Currently, there is no requirement to install the GUI.

Please install v25.0 of CRS (bgp_2500.k) at all sites regardless of whether the site opts to install and use the GUI portion of the package. v25.0 of CRS and the GUI have different requirements; please take note of the requirements section for each piece of the software.

2.1 CRS Distribution Contents and Required Resources

2.2 Contents of Distribution

Table 2-1: Contents of Distribution

File	Description
bgp_2500.k	Kernel Installation and Distribution System (KIDS) file containing software
bgp_250i.pdf	Installation guide in PDF format (this manual)
bgp_250t.pdf	Technical Manual in PDF format
bgp_250u.pdf	User Manual in PDF format
bgp_250u_visual.pdf	Visual CRS User Manual in PDF format
bgp_2500client.zip	Visual CRS software for Client's PC

2.2.1 Required Resources

- Kernel v8.0 p1018 (XU*8.0*1018) or later.
- FileMan v22.0 p1018 (DI*22.0*1018) or later.

- Taxonomy v5.1 p60 or later must be installed (atx_0510.60k, atx*5.1*60).
- IHS Clinical Reporting System v24.1 must be installed (bgp_2410.k).

2.3 Visual CRS (GUI) Distribution Contents and Required Resources

2.3.1 Contents of GUI CRS Distribution

- bgp_2500client.zip.

The following two files are contained in the zip file:

- bgp_2500setup.exe.
- bgp_2500.msi.

2.3.2 Required Resources for GUI CRS

Additional requirements for installing and using Visual CRS on a client's PC:

- On the RPMS Server:
 - BMX v4.0.
 - IHS Clinical Reporting System v24.0.
- On the Client (User's) PC:
 - Windows XP Service Pack 3 or higher.
 - Microsoft Office 2003 or later.
 - .NET Framework v4.0.

Note: If the CRS GUI will not be installed, ignore these requirements.

If the .NET Framework v4.0 is not installed, it will automatically be downloaded and installed when the client installation is started.

2.4 Before You Begin: Installation Issues

1. Make a copy of this distribution for offline storage.
2. Print all notes/readme files.
3. Create a printed audit trail in case there are any problems with the installation.

To capture terminal output during the installation, use an auxport printer attached to the terminal on which the installation is being performed.

3.0 Installation Instructions

Note: This installation is a KIDS install. For any questions on how to do a KIDS installation, please contact your Area Office information systems support personnel.

In all UCIs running the IHS CRS:

1. Ensure that users are unable to use the CRS for the duration of this installation.
2. Save all routines (^%RO (CACHE) in the BGPX* namespace for use in returning to the prior existing version, if needed.

Note: If this is a first time install there may not be any BGPX* routines or there may be just a few of them. If no problems are noted with the new installation, remove saved routines from your system seven to ten days after this install.

3. Install **bgp_2500.k**. This is the KIDS file for the IHS CRS:
 - a. Load the distribution into KIDS using **Option 1** on the **KIDS Installation menu**. The distribution was released in a file named **bgp_2500.k**.
 - b. Verify the load using **Option 2** on the **KIDS Installation** menu.
 - c. Consider using **Options 3** and **4** on the **KIDS Installation** menu to print and compare the Transport global.
 - d. Install the distribution using **Option 6** on the **Installation** menu.
 - e. To see results, use the **KIDS Install File Print** option to view/print the IHS CLINICAL REPORTING v25.0 entry.

Note: For assistance with a KIDS install, call the Area Office support personnel.

4. After the install completes, assign security keys, as appropriate, using Table 3-1.

Table 3-1: Assigning security keys

Name	Descriptive Name	Description
BGPZAREA	BGP Area Report	This key unlocks the Area Office report options on the main BGPMENU. Note: This key should be assigned <i>only</i> at the Area Office level.
BGPZMENU	BGP Main Menu–CRS	This key unlocks the main CRS menu. It should be assigned to all users who need to run GPR/CRS reports.

Name	Descriptive Name	Description
BGPZ PATIENT LISTS	BGP Patient Lists	This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should be given <i>only</i> to those users who have a need for such information.
BGPZ SITE PARAMETERS	BGP Site Parameters	This key should be given to those with authority to update the site parameters.
BGPZ TAXONOMY EDIT	BGP Taxonomy Edit	This key should be given <i>only</i> to users who will need to update taxonomies.

3.1 Installation of the CRS GUI

There are two parts to the CRS GUI install: installation on the RPMS server and installation on the local (client) PC. See the steps below for installation instructions.

3.1.1 Installation on the RPMS Server

1. Make sure BMX v4.0 is installed in RPMS on the RPMS Server.
2. Make sure CRS v25.0 is installed in RPMS on the RPMS server. (See instructions above.)

Note: If a previous version of Visual CRS is being used you will not need to perform Steps 3 and 4. If this is the first time Visual CRS is being used, perform Steps 3 and 4.

3. Assign option **BGPGRPC** as a secondary menu option with a synonym of **BGPG** for each user.
4. Assign option **BMXRPC** as a secondary menu option with a synonym of **BMX** for each user.

3.1.2 Installation on Each User's (Client) PC

1. Place **bgp_2500client.zip** into a directory of your choice and unzip the file. There are two files included in the zip file: **bgp_2500.msi** and **bgp_2500setup.exe**.
2. Double-click the **bgp_2500setup.exe** file that was distributed with Visual CRS. If asked, accept the License Agreement, and follow the instructions for downloading and installing Microsoft .Net Framework v4.0. This will only occur if the most current version of Microsoft .Net Framework v4.0 is not on the local PC. This step takes approximately 20–30 minutes over a DSL connection.
3. Follow the prompts on the **Visual CRS Setup** screens and accept all the defaults.

4. Double-click the **Visual CRS** shortcut that displays on the desktop.
5. If this is the first install, a new connection must be added. Please refer to the *BMX 4.0 User Manual* for instructions.
6. When the **RPMS Login** window displays, enter the RPMS access, and verify codes and click **OK**.
7. If data for multiple facilities is stored on the same RPMS database, the **Select Division** window displays. Select a Division and click **OK**.
8. You are now running the Visual CRS software.

4.0 Sample Installations

4.1 Sample Installation of CRS on RPMS Server

```

IHS CLINICAL REPORTING 25.0 Installed.
      Feb 25, 2025@14:14:46

Not a VA primary domain

Install Completed
```

Figure 4-1: Sample installation for IHS Clinical Reporting package 24.0

4.2 Sample Installation of the CRS GUI

1. Double-click **bgp_2500setup.exe** to launch the **Indian Health Service CRS Setup Wizard**.
2. The **Indian Health Service CRS Setup Wizard** dialog displays (Figure 4-2).

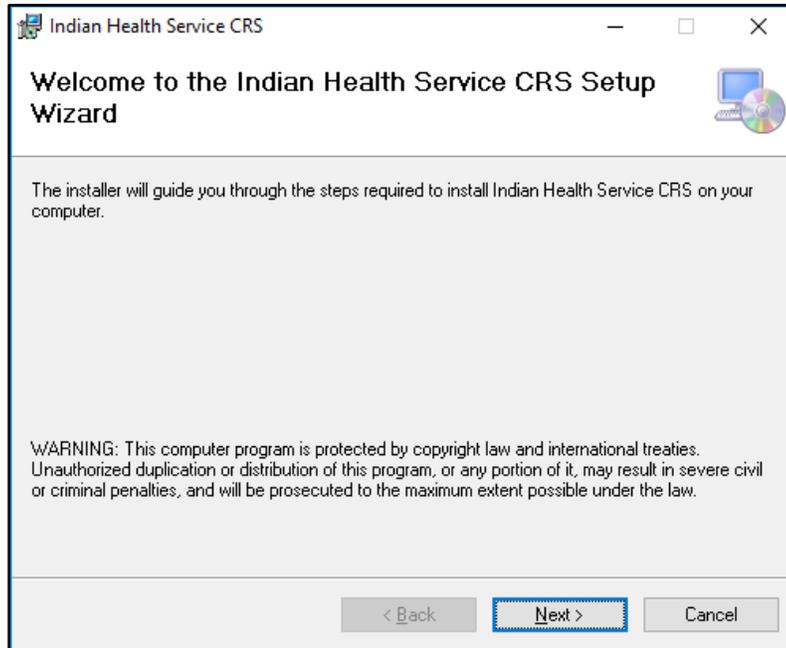

Figure 4-2: Indian Health Service CRS Setup Wizard, Welcome dialog

3. Click **Next** on the Setup Wizard dialog to display the **Select Installation Folder** dialog. See Figure 4-3.

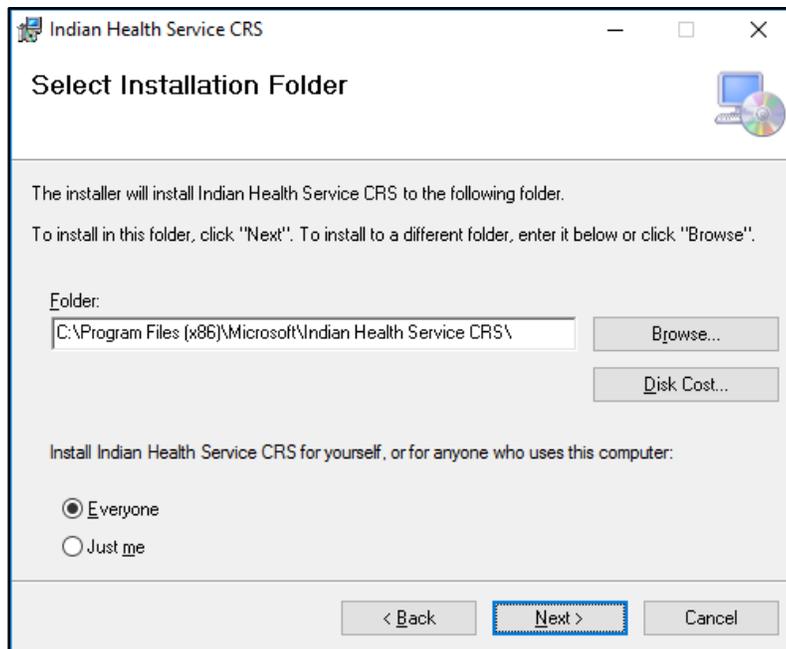

Figure 4-3: Indian Health Service CRS Setup Wizard, Select Installation Folder dialog

4. Click **Next** to display the **Confirm Installation** dialog. See Figure 4-4.

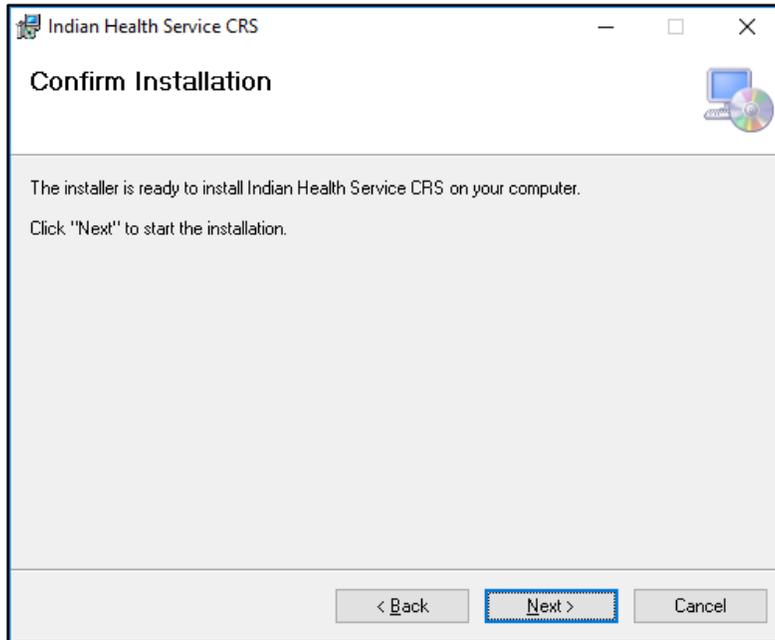

Figure 4-4: Indian Health Service CRS Setup Wizard, Confirm Installation dialog

5. Click **Next** to display the **Installing Indian Health Service CRS** dialog. See Figure 4-5.

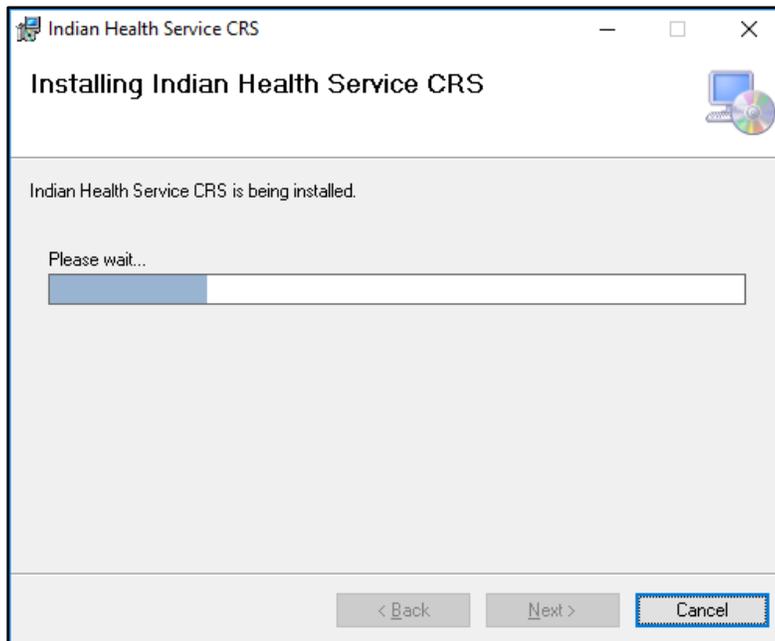

Figure 4-5: Indian Health Service CRS Setup Wizard, Installing Visual CRS dialog

6. Wait while the application installs. When the installation is complete, the **Installation Complete** dialog displays. See Figure 4-6.

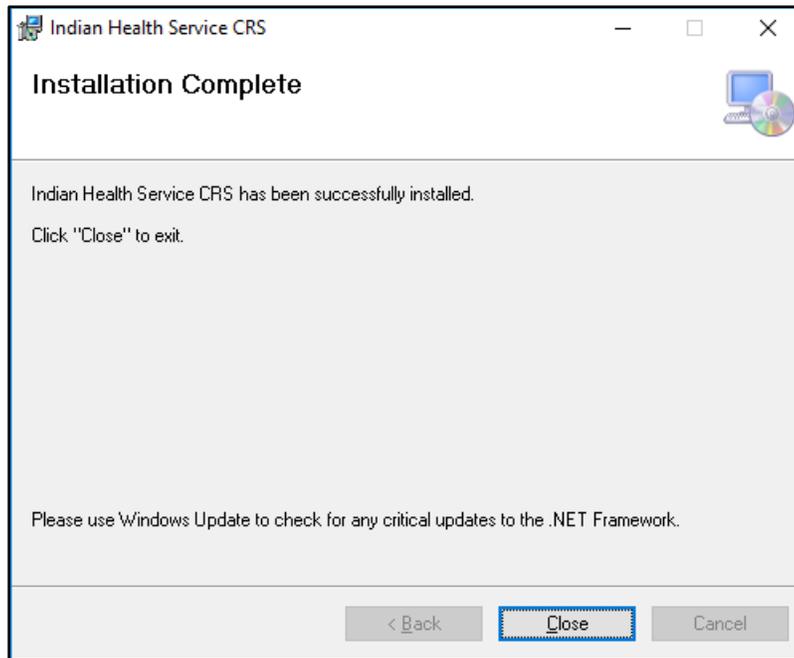

Figure 4-6: Indian Health Service CRS Setup Wizard, Installation Complete dialog

7. Click **Close**.

A desktop shortcut named **CRS 25.0** should now be available. Refer to the user manual for instructions on use of the Visual CRS application.

5.0 Installation Configuration

The requirements for successful installation are listed in Sections 2.2.1 (KIDS build) and 2.3.2 (GUI install). There are no other reference materials other than this installation manual.

Acronym List

Acronym	Definition
BNI	Brief Negotiated Interview
CPT	Current Procedural Terminology
CRS	Clinical Reporting System
eCQM	Electronic Clinical Quality Measures
ENDS	Electronic Nicotine Delivery Systems
FY	Fiscal Year
GPRA	Government Performance and Results Act
GPRAMA	GPRA Modernization Act
GUI	Graphical User Interface
HEDIS	Healthcare Effectiveness Data and Information Set
ICD	International Classification of Diseases
IHS	Indian Health Service
IPC	Improving Patient Care
KIDS	Kernel Installation and Distribution System
LDL	Low-Density Lipoprotein
PPN	Patient Preferred Name
RPMS	Resource and Patient Management System
SBIRT	Screening, Brief Intervention, and Referral to Treatment
SNOMED	Systematized Nomenclature of Medicine
SUD	Substance Use Disorder
UCI	Unique Client Identifier
