More About the EPP Process

CCI 332.01 and https://dcp.psc.gov/ccmis/promotions/PROMOTIONS_EPP_m.aspx

- Officers transferring from a **nominating** agency will be removed from consideration unless:
  - Supported by the **receiving** agency
  - Receiving agency has not met its quota (highly unlikely)

- Officers transferring to a lower billet than required will be removed from consideration

- If successful, officers are required to remain at the sponsoring agency for 1 year

- Board is unaware of which officers are EPP nominees and which are eligible in their own right. We do not recommend putting an EPP nomination on your CV

- EPP nominees are subject to all eOPF deadlines and administrative requirements
More About the IHS EPP Process

- Eligibility list sent to Area/HQ Office Directors who determine their internal selection process
- Selectees reviewed by an internal IHS review board of senior leaders
  - Scored and ranked according to promotion benchmarks
  - Consensus ranking determines the recommendations to IHS Director
- Once approved by IHS Director, nominations sent to CCHQ
- Area/Office Directors and officers are notified of results
- Nominees’ CV and OS are reviewed by Liaisons before eDOC-U submission
- Promotion eligibility will reflect in the officer’s dashboard after manual entry
- All promotion deadlines apply
UPDATES ON ITEMS FROM PREVIOUS MONTHLY MEETINGS

COMMENDATION MEDAL

(Opening Statement-Standard)
The Commendation Medal is awarded to LCDR Mickey E. Mouse for continuous exceptional service. LCDR Mickey E. Mouse distinguished herself as an Engineering Consultant assigned to the Indian Health Service, Area Sanitation Facilities Construction Branch, from December 1, 2014 to August 30, 2020.

(Summary of Award Write Up)
ACCOMPLISHMENTS: LCDR Mickey E. Mouse was detailed to the Area office on for a 120 day detail that was extended to 12 months before she was ultimately hired into an O-5 Engineer Consultant billet at the Area office. For the previous three years and during a period of reduced budgets and lapsed positions, the SFC Program had operated with a single Director at the Area office. Having historically been staffed with a Director (O-6 billet) and two Deputy Directors (O-6 billet), the Area Office had fallen far behind in the project management and reporting responsibilities/requirements of a Program consisting of 23 engineers, 15 support staff, ten (10) offices, and an annual design/construction budget of approximately $15M - $20M for service to 47 Tribes in four states.
Your Questions

(Bullet 1 with Impact)

• Management of finance records –

  o Responsible for first line approval of all financial transactions for a portfolio of over 200 projects totaling over $60M. **IMPACT:** Her leadership and guidance reduced financial submission errors to nearly 100% where timeliness is critical to ensure prompt payment to Tribes to avoid late interest charges on projects where every dollar is vital.

  o Reconciled all project financial records in the national SFC data system that is reported annually to Congress **IMPACT:** HQ initiative to clean-up financial records for auditing purposes and through her single-handed work, it was completed ahead of schedule.
Your Questions

(Bullet 2 with Impact)

- National Environmental Policy Act (NEPA) Coordinator

  - Oversees completion of NEPA checklists associated with $10M-$15M in projects on an annual basis, mentors/trains the entire SFC staff, and issues updates as laws and regulations change. **IMPACT:** The NEPA coordinator position was in the past a funded position for only the specific duty of NEPA. However, LCDR Mickey E. Mouse accepted the collateral role and was able to complete these responsibilities as well as her other duties, allowing additional engineers to be hired to complete sanitation projects.

  - Produced a scope of work for an Architectural and Engineering firm resulting in the completion of an Environmental Assessment for the $20M Arsenic Mitigation Project. **IMPACT:** This project has national significance as it is the largest project funded in SFC History and also reduces arsenic levels, a contaminant regulated by the Environmental Protection Agency in drinking water for approximately 1,300 homes.
