# Diabetes Management System

- Diabetes Management System (DMS) is just one of the application of the Resource and Patient Management System (RPMS).
- Diabetes Management System can also be referred to as DM, DMS, and BDM.
- There are two versions of the DMS.
  - Roll and Scroll – version discussed today
  - Visual DMS - windows based tool or GUI (graphical user interface)
- DMS is used to manage Registers, provide reports such as the DM Audit and Diabetes Health Summaries.

# Update the Diabetes Register

## AS Audit Setup Menu

### INA - List Possible Inactive Pts in the DM Registry

- This report will help find patients who have not been seen during the Audit period and are still marked as “active” in the Register.
- This report can be useful at sites that have large numbers of patients in the Register where the status might not be accurate.
- Patients on this list can be changed to “inactive” so they will not be included in the Audit.

# Review/Update Taxonomies

# Taxonomies

- RPMS Taxonomies are data sets
- Groups of related items such as
  - Medications
  - Lab Tests
  - Diagnosis
  - Health Factors
  - Clinics
- Updating Taxonomies
  - Standard updates
  - Local updates (specific local taxonomy names)

# Taxonomies

- Taxonomies might have been updated for the **2023 Annual Audit**, they must be reviewed and updated again before running the **2024 Annual Audit** due to:
  - New medications may have been added to the pharmacy formulary.
  - New lab tests offered.
- Several of the taxonomies listed may begin with BGP rather than DM AUDIT. These taxonomies, as well as several of the DM AUDIT taxonomies, are shared between the Government Performance and Results Act (GPRA) program and the DMS.
- The DMS User's Manual has a listing of taxonomies to consider for use and adding.
- It is important that staff work together to review and update these taxonomies. (Pharmacy and Lab)

# Data Quality Check

# Data Quality Check

The Data Quality Check feature reviews each data item and looks for things that might be and/or are definitely incorrect.

- **Two types of errors:**
  - **Potential:** Value might be incorrect.
    - Values that are higher or lower than expected.
    - Example: A1c<2
  - **Definite:** Value is definitely incorrect according to Audit logic.
    - Often related to dates and skip patterns.
    - Example: Date of Diabetes Diagnosis is before year of birth (YOB).

## AUDIT SETUP

Select Audit Setup <TEST ACCOUNT> Option: TU Update/Review Taxonomies for 2024

Select Audit Setup <TEST ACCOUNT> Option: DQC 2024 Data Quality Check Report

In order for the 2024 DM AUDIT Report to find all necessary data, several taxonomies must be established. The following taxonomies are missing or have no entries:

LABORATORY TEST taxonomy [BGP HEP C TESTS TAX] contains a panel test: HEPATITIS C PROFILE and should not.

DRUG taxonomy [DM AUDIT AMYLIN ANALOGUES] has no entries

DRUG taxonomy [DM AUDIT COLESEVELAM DRUGS] has no entries

LABORATORY TEST taxonomy [DM AUDIT HGB A1C TAX] contains a panel test: HGB A1c (R) and should not.

DRUG taxonomy [DM AUDIT SULFONYLUREA-LIKE] has no entries

DRUG taxonomy [DM AUDIT TIRZEPATIDE DRUGS] has no entries

End of taxonomy check. HIT RETURN:

**Note:** TC Check Taxonomies for the 2024 DM Audit in Audit Setup Menu.

# Data Quality Check

The Data Quality Check feature reviews each data item and looks for Potential Errors and Definite Errors. Correct your data, if needed.

- **If data corrected:**
  - In RPMS before uploading, errors will not appear in WebAudit version.
  - In the WebAudit, but not RPMS, errors will still appear in DMS version.
- **Correct data in RPMS, if possible, before creating your data file.**
  - Be sure to verify data before making any changes in RPMS.
  - If a data file is uploaded into the WebAudit and changes are made in RPMS, create a new data file and upload new data file into the WebAudit (will overwrite previous).

# Create an Audit Data File

# Audit Export Data File

- Creating the Audit export data file
- Retrieving the Audit export file
  - May require assistance from your local IT staff
  - Provide the name of the file and where you want the file placed.
  - Do not send file through email, even if encrypted
  - IHS Secure Data Transfer Service (SDTS) (option)
- Uploading the Audit export file to the WebAudit
