Limit Added Sugar

Sugar in food can occur naturally or can be added. Sugars (simple carbohydrates) are digested quickly and change to glucose as fuel for the body. Too much sugar is not good for you.

Natural Sugar

Natural sugar is in fruits and naturally sweetened fruit juices, milk, and some vegetables.

Added Sugar

Added sugars are syrups and sugars that are added to foods and drinks during preparation, processing, or at the table.

Too much added sugar may contribute to health problems such as, weight gain, obesity, and diabetes.

Eating large amounts of added sugar may make it difficult to get all the daily nutrients your body needs and may cause you to consume too many calories.

Major Sources of Added Sugar

Sugar Sweetened Drinks
- Sodas & Soft Drinks
- Teas & Coffees
- Energy & Sport Drinks
- Powdered Drink Mixes
- Fruit Drinks

Desserts
- Cupcakes & Muffins
- Cakes & Pies
- Ice Cream
- Cookies & Donuts
- Candy

Sweet Breakfasts
- Sweet Cereals
- Cereal Bars
- Pastries
- Pancakes with Syrup
- Flavored Yogurt

Syrups and Sweets
- Jams
- Jellies
- Chocolate Syrup
- Honey
- Molasses
Reducing Added Sugar

- Choose sugary foods and drinks less often.
- Have smaller servings of sugary foods or drinks.

* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

Let the Nutrition Facts Label Be Your Guide

Check the label to see if foods are LOW or HIGH in added sugars.

- 5% Daily Value or less is LOW in added sugar
- 20% Daily Value or more is HIGH in added sugar

In this example, the added sugar is 23 grams, and the Daily Value is 46%. This food is high in added sugar.

The Daily Value for added sugars is 10% of total calories per day.

For example, if your daily food intake is about 2,000 calories, this would be 50 grams of added sugars.
