SUMMARY OF IHS AND TRIBALLY OPERATED FACILITIES LIST FOR OCTOBER 1, 1981

GENERAL

This new list, unlike previous ones, incorporates both IHS and tribally operated facilities within each service unit and area. The total figures shown by type of facility on page one should be interpreted with caution. The total column shows only the combined number of IHS operated facilities and the number of tribally operated facilities within the geographic boundaries of that particular service unit. It does not imply the nature of the financial or contractual arrangements between IHS and the tribes.

The 99 service units listed in the 11 Areas of IHS include 82 which are administered directly by IHS and 17 which are tribally administered. Of the total 52 hospitals shown, 48 are operated by IHS and 4 are tribally operated. On October 1, 1981, there were 109 health centers, 81 were IHS operated and 28 were tribally operated. All of the 17 school health centers listed were operated by IHS. Tribes or tribal organizations operated 38 of the 116 total health stations, with IHS operating the remaining 78. Although California has no service units, the number of projects operated by IHS increased from 17 last year to the present 19 projects as of October 1, 1981.

Overall IHS Facility Changes Since October 1, 1980 List By Area

Aberdeen: Very few changes were seen in Aberdeen during the past year. Santee health station in the Yankton-Wagner Service Unit became tribally operated; and Tama Health Station (tribally operated) was added to the Sac and Fox Service Unit. Thus the number of health stations increased from 24 on October 1, 1980, to 25 in FY 1982 (on October 1, 1981).

Bemidji: In this new list, the thirteen service units are divided into the six which are IHS administered and the seven which are tribally operated. The two hospitals in Bemidji are IHS operated, while only two of the nine health centers listed are run by IHS. The twenty health stations listed include seven which are administered by IHS and thirteen which are tribally operated. The 86 health locations listed for Bemidji in the October 1, 1980, list dropped to 46 in this current list.

Alaska The number of service units in the Alaska Area increased from eight to nine during the past year with the addition of the IHS administered Annette Island Indian Reserve Service Unit. Two service units, Bristol Bay Area and Norton Sound are tribally administered. In this year's list, the two tribally operated hospitals, Bristol Bay Area and Norton Sond are included, bringing the total number of hospitals in the Alaska Area to eight. Although the number of health centers in the Alaska Area remains unchanged at seven, Ft. Yukon in the Interior Alaska Service Unit is now tribally operated. All of the ten health stations listed in Alaska are tribally operated.

Albuquerque: The only changes in the list from last year were the additions of two tribally operated facilities, the Pine Hill Health Center in the Zuni-Ramah Service Unit, and the Albuquerque Urban Indian Center (health station) in the Albuquerque Service Unit. The only other change was the deletion of the six health locations of the Albuquerque Service Unit in the previous list.

Billings: The present list of facilities in the Billings Area includes the two tribally operated health stations, 1) Preventive Health Care Center in the Crow Service Unit, and 2) the Qua Qui Health Clinic in the Flathead Service Unit.

Navajo: The increase in the number of hospitals from five to six reflects the addition of the tribally operated Sage Memorial Hospital in the Fort Defiance Service Unit. Although the total number of health centers has not changed at 14, the number of IHS operated health centers has decreased by two. The Many Farms Health Center in Chinle and the Fort Wingate Health Center in Gallup Service Unit are closed. Two tribally operated health centers, Rough Rock in Chinle Service Unit, and Navajo Mountain in the Kayenta Service Unit bring the total number of health centers back up to 14. The total number of school health centers declined from seven in the 1980 list to five in the 1981 list. The Chuska Tohatchi school health center was closed during the 81 fiscal year, and it was learned that the Fort Wingate Elementary and Fort Wingate High School health centers are really one school health center. The number of IHS operated health stations reported by Navajo declined from 15 to 10 during fiscal year 1981. Grey Mountain, Kaibeto, Red Lake, and Page Health Stations were closed in the Tuba City Service Unit and Lukachukai Health Station was closed in the Chinle Service Unit. Montezuma Creek in the Shiprock Service Unit formerly IHS operated, is now tribally operated. A new health station, Objatoh, which is also tribally operated is located in the Kayenta Service Unit. Thus, the total number of health stations is twelve.

Oklahoma: The number of hospitals decreased from seven to six by the closing of the inpatient department of the Pawnee Hospital and making it an outpatient facility (health center) only. The Wyandotte Health Center shown in the October 1980 list was mistakenly listed. It is combined into one health center, the Delaware District (Jay) Health Center. The tribally operated health center, Central Oklahoma American Indian Health Council is included in the Shawnee Service Unit.

Phoenix: The Phoenix Area dropped three health stations shown in the 1980 list and reduced the number of health locations presently being used from 115 to 39. The two tribally operated health centers included in this years list, Reno-Sparks and Washoe are both located in the Schurz Service Unit.

Portland: The new service unit, Western Oregon, increases the total number in Portland to twelve. The two tribally operated health centers Puyallup and Tulalip are both located in the Puget Sound Service Unit, bringing the total number of health centers in Portland from 14 to 16. The total number of health stations increased from thirteen to seventeen by the addition of four tribally operated clinics. At the same time two IHS health stations, Burlington and Deming, both in the Northwest Washington Service Unit became tribally operated, dropping the number of IHS run health stations to eleven.

U.S.E.T.: The ten service units were divided into the two which are IHS administered and the remaining eight which are tribally administered. Also included are the ten tribally operated health centers.

Tucson: The number of IHS run facilities did not change. The new list shows that there is one tribally operated health station in the Tucson Area.

SUMMARY OF IHS AND TRIBALLY OPERATED FACILITIES LIST AS OF OCTOBER 1, 1982

GENERAL

The present list was compiled with the assistance of all Areas and Program Offices throughout the Indian Health Service (IHS). Copies of the previous summary were sent to all Area/Program Directors asking them to bring their respective Area/Program facility lists up to date as of October 1, 1982. Their cooperation is greatly appreciated.

The total number of IHS and tribally operated service units remained at 99. However, Aberdeen Area and U.S.E.T Program Office each, lost and gained one service unit, respectively. The Intermountain Service Unit in the Billings Area is no longer designated as a service unit but is listed for statistical purposes only. The establishment of Southern Colorado Service Unit in the Albuquerque Area increases its service unit total from five to six. The California Program, although it has no service units, has 19 tribally operated projects. These are excluded from the count of service units.

The total number of hospitals which are either IHS or tribally operated dropped from 52 to 51 with the closing of inpatient services at Tanana Hospital in the Alaska Area. Tanana is now classified as a health center.

The number of IHS and tribally operated health centers increased by only one from 109 to 110. However, the number of tribally operated health centers increased from 28 to 34, while the number of IHS health centers decreased from 81 to 76. The number of school health centers dropped from 17 to 14 while the total number of health stations increased from 116 to 120.

The total figures shown by type of facility in this list should be interpreted with caution. The totals reflect only the combined number of IHS and tribally operated facilities within the geographic boundaries of service units. Nothing should be inferred regarding the nature of the financial or contractual arrangements between IHS and the tribes or tribal organizations operating facilities within the service unit boundaries.

Area and Program Office Changes Since October 1, 1981

Aberdeen: Total number of service units declined from 13 to 12 with the dropping of Sac and Fox as a service unit. The only other change was the administrative transfer of the Red Shirt Table Health Station from the Pine Ridge Service Unit to the Rapid City Service Unit.

Bemidji: One health station, Whitefish Bay was added to the Eastern Michigan Service Unit. The Minnesota River service unit was reclassified as an IHS operated service unit rather than a tribally operated service unit. Three service unit names were changed from last year: Northwestern Wisconsin (formerly Lac Courte Oreilles, Nicolet (formerly Lac du Flambeau) and Minnesota River (formerly Minnesota Sioux).

Alaska: Inpatient services were closed in Tanana Hospital on July 15, 1982. Tanana is now classified as a health center.

Albuquerque: The new Southern Colorado Service Unit increases the total from five to six service units. There were no facility changes in Albuquerque during the past year.

Billings: One major change in the Billings Area was the opening of the new Lodge Grass Health Center in latter part of FY 1982, bringing the total number of health centers in the Area to nine.

Navajo: Number of health centers dropped from 14 to 12. Navajo Health Center was closed in early FY 1982. Lower Greasewood was changed in status to a health station. The Shiprock MCH Health Center in Shiprock Service Unit was closed on July 1, 1982. The Page Family Health Center was opened on October 1, 1982. Of the four school health centers listed in FY 1981, two, Sanostee and Tuba City, were closed for budgeting reasons. The tribally operated Tsaile Health Center which serves the community college is classified by Navajo Area as a school health center.

Oklahoma: Three health centers were added, all of which were formerly health stations: (1) Indian Health Care Resource Center (tribally operated) in the Claremore Service Unit; (2) Carnegie Health Center in the Lawton Service Unit; and (3) D.K. Martin (tribally operated) in the Tahlequah Service Unit. Two health stations, Seneca in the Claremore Service Unit and Sequoyah in the Tahlequah Service Unit, were closed during FY 1982.

Phoenix: As a result of telephone conversations with key Area Program Planning staff, three health centers 1) Second Mesa, 2) Salt River and 3) Gila Crossing were changed to the status of health stations. All three better fit the IHS Manual definition of a health station. The closing of the Stewart Indian Boarding School and the opening of the health center to the total Indian population changed its status from school health center to health center. Four health locations 1) Supai, 2) Fort McDowell, 3) San Lucy and 4) Fort McDermitt moved up in status to health station. As a result of these numerous changes in Phoenix Area there are now seven health centers (5 IHS operated and 2 tribally operated), two school health centers and 7 health stations as seen on page 10 of the list.

Portland: The major change in this Area occurred among health stations. The total number decreased from 17 to 15. Two new health stations were added; Omak in Colville Service Unit, and Nisqually in the Puget Sound Service Unit. Blackfoot, Siletz and Plummer Health Stations were closed during FY 1982. Muckleshoot Health Station in the Puget Sound Service Unit was moved to the status of health center. Numerous health locations, especially those in the Fort Hall and Puget Sound Service Units were dropped for FY 1982.

Tucson : No changes during FY 1982.

U.S.E.T.: The one major change in the U.S.E.T. Program Office this year was the addition of the Tunica-Buloxi Tribally operated service unit located in Rapides and Avoyelles Parishes, Louisiana. Three health stations, Bogue Chitto, Conehatta and Red Water which were mistakenly omitted in the previous list are part of the Choctaw Service Unit.

DATE: October 26, 1999

TO: Area Statistical Officers

FROM: Principal Statistician

SUBJECT: IHS and Tribally Operated Facilities as of October 1

The IHS Program Statistics Team annually compiles lists that identify IHS and tribally operated health facilities. In order to properly complete the requested lists and tables, it is necessary to define a tribally operated facility:

A tribally operated facility is an IHS funded facility for which a Tribe is responsible for its operation, in terms of the primary provision of health services, regardless of who owns the facility. In other words, the health services staff based at the facility are under the administrative control of the Tribe. (The fact that IHS providers may periodically go to the facility to provide services does not change the classification of the facility as tribally operated. Facilities run by community health aides in Alaska would be considered tribally operated based on this definition).

Attached for your review and revision are two lists. All Urban Projects should be excluded. The lists are to reflect the status of facilities as of October 1, 1999.

LIST #1: "IHS AND TRIBALLY OPERATED SERVICE UNITS AND FACILITIES"

This list should identify IHS-operated and tribally operated hospitals and ambulatory medical care facilities (e.g., omit dental clinics). For your convenience, the definition of the various types of facilities is attached.

LIST #2: "LIST OF HEALTH FACILITIES OPERATED BY INDIAN AND ALASKA NATIVE TRIBES AND ORGANIZATIONS"

This list should identify all types of Indian-operated health facilities (other than Urban Projects) and their location, including non-medical care facilities such as dental clinics.

FACILITY DEFINITIONS

Types and Definitions of IHS/Tribal Facilities

(1) Treatment Facility. A facility which is primarily used by the Public Health service or a Tribe under contract to the Public Health Service to provide direct and/or contract clinical treatment services to Indian consumers.

(a) Hospital. A permanent facility which contains inpatient beds, organized staff including physician services, and continuous nursing services and provides comprehensive health care including diagnosis and treatment for patients.

(b) Health Center. A facility, physically separated from a hospital, with a full range of ambulatory services including at least primary care physicians, nursing, pharmacy, laboratory and X-ray, which are available at least 40 hours a week for outpatient care.

8 Health Station. A facility, physically separated from a hospital or health center, where primary care physician services are available on a regularly scheduled basis but for less than 40 hours a week.

The expected responses for OWNERSHIP, TYPE OF PROVIDER, and ACCREDITATION columns are as follows:

Column: OWNERSHIP
Response: IHS
Tribe
Private

Column: TYPE OF PROVIDER
Response: IHS
FQHC (Federally Qualified Health Center)
RHC (Rural Health Center)
405 Demo (Demonstration Program, Sec 405 of the Indian Health Care Improvement Act)
Other Medicaid (Other Medicaid provider under state plan)

Column: ACCREDITATION
Response: JCAHCO (Joint Comm on Accreditation of Health Care Organizations)
AOA (American Osteopathic Assn)
HCFA (Health Care Financing Administration)--usually done by HCFA regional office or through the State
AAAHC (Assn for Accreditation of Ambulatory Health Centers)
None

Please clarify through the "name of facility" the type of each facility (e.g., hospital, health center, health station, dental clinic, nursing home, extended care facility); for example, Okmulgee Dental Clinic.

RELATIONSHIP BETWEEN THE FACILITIES ON THESE LISTS AND THE IHS STANDARD CODE BOOK

Each of the facilities on these lists should have one and only one facility code in the IHS Standard Code Book. Conversely, the medical facilities in the Code Book should contain only the hospitals and ambulatory care facilities shown on these lists.

Those health facilities that are classified as tribally operated, according to the preceding definition, must be identified as such in the IHS Standard Code Book, and subsequently in the medical reporting systems (inpatient, APC, contract). That is, workload reported for a tribally operated facility in an IHS reporting system must be reported using the tribal version of the Area code. Furthermore, all workload that is generated within a tribally operated facility must be reported using that code, regardless of whether the person providing the care was tribal, IHS, or other. "Non-IHS" facilities must also be properly identified.

Please contact me via e-mail to modify facility codes in the IHS Standard Code Book, as soon as possible.

SUBMISSION DATE

It is requested that the two updated facility lists be submitted by November 15, to the Senior Statistician, Patient Care Statistics, IHS/OPH/DCEH, Suite 450, 12300 Twinbrook Parkway, Rockville, MD 20852.

Questions and comments should be directed to me via e-mail or telephone (301-443-1180).

Thank you for your assistance.

DATE: October 26, 1999

TO: Area Statistical Officers

FROM: Principal Statistician

SUBJECT: IHS and Tribally Operated Facilities as of October 1

The IHS Program Statistics Team annually compiles lists that identify IHS and tribally operated health facilities. In order to properly complete the requested lists and tables, it is necessary to define a tribally operated facility:

A tribally operated facility is an IHS funded facility for which a Tribe is responsible for its operation, in terms of the primary provision of health services, regardless of who owns the facility. In other words, the health services staff based at the facility are under the administrative control of the Tribe. (The fact that IHS providers may periodically go to the facility to provide services does not change the classification of the facility as tribally operated. Facilities run by community health aides in Alaska would be considered tribally operated based on this definition).

Attached for your review and revision are two lists. All Urban Projects should be excluded. The lists are to reflect the status of facilities as of October 1, 1999.

LIST #1: "IHS AND TRIBALLY OPERATED SERVICE UNITS AND FACILITIES"

This list should identify IHS-operated and tribally operated hospitals and ambulatory medical care facilities (e.g., omit dental clinics). For your convenience, the definition of the various types of facilities is attached.

LIST #2: "LIST OF HEALTH FACILITIES OPERATED BY INDIAN AND ALASKA NATIVE TRIBES AND ORGANIZATIONS"

This list should identify all types of Indian-operated health facilities (other than Urban Projects) and their location, including non-medical care facilities such as dental clinics.

FACILITY DEFINITIONS

Types and Definitions of IHS/Tribal Facilities

(1) Treatment Facility. A facility which is primarily used by the Public Health service or a Tribe under contract to the Public Health Service to provide direct and/or contract clinical treatment services to Indian consumers.

(a) Hospital. A permanent facility which contains inpatient beds, organized staff including physician services, and continuous nursing services and provides comprehensive health care including diagnosis and treatment for patients.

(b) Health Center. A facility, physically separated from a hospital, with a full range of ambulatory services including at least primary care physicians, nursing, pharmacy, laboratory and X-ray, which are available at least 40 hours a week for outpatient care.

8 Health Station. A facility, physically separated from a hospital or health center, where primary care physician services are available on a regularly scheduled basis but for less than 40 hours a week.

The expected responses for OWNERSHIP, TYPE OF PROVIDER, and ACCREDITATION columns are as follows:

Column: OWNERSHIP
Response: IHS
Tribe
Private

Column: TYPE OF PROVIDER
Response: IHS
FQHC (Federally Qualified Health Center)
RHC (Rural Health Center)
405 Demo (Demonstration Program, Sec 405 of the Indian Health Care Improvement Act)
Other Medicaid (Other Medicaid provider under state plan)

Column: ACCREDITATION
Response: JCAHCO (Joint Comm on Accreditation of Health Care Organizations)
AOA (American Osteopathic Assn)
HCFA (Health Care Financing Administration)--usually done by HCFA regional office or through the State
AAAHC (Assn for Accreditation of Ambulatory Health Centers)
None

Please clarify through the "name of facility" the type of each facility (e.g., hospital, health center, health station, dental clinic, nursing home, extended care facility); for example, Okmulgee Dental Clinic.

RELATIONSHIP BETWEEN THE FACILITIES ON THESE LISTS AND THE IHS STANDARD CODE BOOK

Each of the facilities on these lists should have one and only one facility code in the IHS Standard Code Book. Conversely, the medical facilities in the Code Book should contain only the hospitals and ambulatory care facilities shown on these lists.

Those health facilities that are classified as tribally operated, according to the preceding definition, must be identified as such in the IHS Standard Code Book, and subsequently in the medical reporting systems (inpatient, APC, contract). That is, workload reported for a tribally operated facility in an IHS reporting system must be reported using the tribal version of the Area code. Furthermore, all workload that is generated within a tribally operated facility must be reported using that code, regardless of whether the person providing the care was tribal, IHS, or other. "Non-IHS" facilities must also be properly identified.

Please contact me via e-mail to modify facility codes in the IHS Standard Code Book, as soon as possible.

SUBMISSION DATE

It is requested that the two updated facility lists be submitted by November 15, to the Senior Statistician, Patient Care Statistics, IHS/OPH/DCEH, Suite 450, 12300 Twinbrook Parkway, Rockville, MD 20852.

Questions and comments should be directed to me via e-mail or telephone (301-443-1180).

Thank you for your assistance.

Subject: Request to Update Facility Lists

Steve:

I have FAXed you a copy a an updated Facility List as of October 1, 1999. Corrections and changes are highlighted in **BOLD** type and another copy shows the handwritten corrections. I have put two updated lists in the mail (Federal Express) to you.

<< File: 3504.DOC >> << File: 3501.DOC >>

DATE: October 26, 1999

TO: Area Statistical Officers

FROM: Principal Statistician

SUBJECT: IHS and Tribally Operated Facilities as of October 1

The IHS Program Statistics Team annually compiles lists that identify IHS and tribally operated health facilities. In order to properly complete the requested lists and tables, it is necessary to define a tribally operated facility:

A tribally operated facility is an IHS funded facility for which a Tribe is responsible for its operation, in terms of the primary provision of health services, regardless of who owns the facility. In other words, the health services staff based at the facility are under the administrative control of the Tribe. (The fact that IHS providers may periodically go to the facility to provide services does not change the classification of the facility as tribally operated. Facilities run by community health aides in Alaska would be considered tribally operated based on this definition).

Attached for your review and revision are two lists. All Urban Projects should be excluded. The lists are to reflect the status of facilities as of October 1, 1999.

LIST #1: "IHS AND TRIBALLY OPERATED SERVICE UNITS AND FACILITIES"

This list should identify IHS-operated and tribally operated hospitals and ambulatory medical care facilities (e.g., omit dental clinics). For your convenience, the definition of the various types of facilities is attached.

LIST #2: "LIST OF HEALTH FACILITIES OPERATED BY INDIAN AND ALASKA NATIVE TRIBES AND ORGANIZATIONS"

This list should identify all types of Indian-operated health facilities (other than Urban Projects) and their location, including non-medical care facilities such as dental clinics.

FACILITY DEFINITIONS

Types and Definitions of IHS/Tribal Facilities

(1) Treatment Facility. A facility which is primarily used by the Public Health service or a Tribe under contract to the Public Health Service to provide direct and/or contract clinical treatment services to Indian consumers.

(a) Hospital. A permanent facility which contains inpatient beds, organized staff including physician services, and continuous nursing services and provides comprehensive health care including diagnosis and treatment for patients.

(b) Health Center. A facility, physically separated from a hospital, with a full range of ambulatory services including at least primary care physicians, nursing, pharmacy, laboratory and X-ray, which are available at least 40 hours a week for outpatient care.

8 Health Station. A facility, physically separated from a hospital or health center, where primary care physician services are available on a regularly scheduled basis but for less than 40 hours a week.

The expected responses for OWNERSHIP, TYPE OF PROVIDER, and ACCREDITATION columns are as follows:

Column: OWNERSHIP
Response: IHS
Tribe
Private

Column: TYPE OF PROVIDER
Response: IHS
FQHC (Federally Qualified Health Center)
RHC (Rural Health Center)
405 Demo (Demonstration Program, Sec 405 of the Indian Health Care Improvement Act)
Other Medicaid (Other Medicaid provider under state plan)

Column: ACCREDITATION
Response: JCAHCO (Joint Comm on Accreditation of Health Care Organizations)
AOA (American Osteopathic Assn)
HCFA (Health Care Financing Administration)--usually done by HCFA regional office or through the State
AAAHC (Assn for Accreditation of Ambulatory Health Centers)
None

Please clarify through the "name of facility" the type of each facility (e.g., hospital, health center, health station, dental clinic, nursing home, extended care facility); for example, Okmulgee Dental Clinic.

RELATIONSHIP BETWEEN THE FACILITIES ON THESE LISTS AND THE IHS STANDARD CODE BOOK

Each of the facilities on these lists should have one and only one facility code in the IHS Standard Code Book. Conversely, the medical facilities in the Code Book should contain only the hospitals and ambulatory care facilities shown on these lists.

Those health facilities that are classified as tribally operated, according to the preceding definition, must be identified as such in the IHS Standard Code Book, and subsequently in the medical reporting systems (inpatient, APC, contract). That is, workload reported for a tribally operated facility in an IHS reporting system must be reported using the tribal version of the Area code. Furthermore, all workload that is generated within a tribally operated facility must be reported using that code, regardless of whether the person providing the care was tribal, IHS, or other. "Non-IHS" facilities must also be properly identified.

Please contact me via e-mail to modify facility codes in the IHS Standard Code Book, as soon as possible.

SUBMISSION DATE

It is requested that the two updated facility lists be submitted by November 15, to the Senior Statistician, Patient Care Statistics, IHS/OPH/DCEH, Suite 450, 12300 Twinbrook Parkway, Rockville, MD 20852.

Questions and comments should be directed to me via e-mail or telephone (301-443-1180).

Thank you for your assistance.
