

Provider Information

FF-L LITERATURE

OUTCOME: The parents/family will receive literature about formula feeding.

STANDARDS:

1. Provide the parent(s) and family with literature on formula feeding.
2. Discuss the content of the literature.

If the provider gives written information such as pamphlets or brochures to the mother about breastfeeding, document the literature given by using: BF-L.

Rather than give the mom a “bag” of pamphlets or brochures, it is best to determine in what area the mom has the most questions or concerns and find suitable brochures or pamphlets for the mom. You should read the pamphlet or handout together so that you can answer any questions the expectant mom has.
