

**I KNOW
MY BODY.
I KNOW
MY STATUS.**

American Indians and Alaska Natives rank third in the nation in their rate of new HIV diagnoses, compared to all other races and ethnicities. It's time for us to protect ourselves and our people.

HIV testing is recommended for everyone as a part of routine healthcare.

Know your body, know your status. To find out more about HIV and where to go to get tested, visit your local clinic or hivtest.org
