Native Americans with diabetes Better diabetes care can decrease kidney failure

Native Americans (American Indians and Alaska Natives) have a greater chance of having diabetes than any other US racial group. Diabetes is the leading cause of kidney failure, a costly condition that requires dialysis or kidney transplant for survival. Kidney failure can be delayed or prevented by controlling blood pressure and blood sugar and by taking medicines that protect the kidneys. Good diabetes care includes regular kidney testing and education about kidney disease and treatment. Kidney failure from diabetes among Native Americans was the highest of any race. However, this has declined the fastest since the Indian Health Service (IHS) began using population health and team-based approaches to diabetes and kidney care, a potential model for other populations.

2X
Native Americans are twice as likely as whites to have diabetes.

2 in 3
In about 2 out of 3 Native Americans with kidney failure, diabetes is the cause.

54%
Kidney failure from diabetes dropped by 54% in Native Americans between 1996 and 2013.

Health care systems can:

- **Use population health approaches to diabetes care.** Assess long-term outcomes and address disparities. Promote wellness of the entire community and connect people to local resources, including healthy food, transportation, housing, and mental health care.
- **Develop a coordinated team approach to diabetes care.** Team-based care should include patient education, community outreach, care coordination, tracking of health outcomes, and access to healthcare providers, nutritionists, diabetes educators, pharmacists, community health workers, and behavioral health clinicians.
- **Integrate kidney disease prevention and education into routine diabetes care.** Screen people with diabetes for kidney disease and make sure that kidney disease is routinely addressed as part of diabetes care.

The poster features a silhouette of a Native American man on the right side. At the bottom, there are three logos: the Department of Health and Human Services, the CDC, and the Indian Health Service.

2017 in Review: Continued

- Quality accomplishments
 - Single accrediting organization for all IHS hospitals
 - New credentialing software system
 - National Quality Accountability Dashboard
 - Patient wait time standards

**All Tribes and Urban Indian
Organizations
Conference Call**

CAPT Francis Frazier
Director, OPHS
December 18, 2017

Workgroup

- Purpose
 - Draft final mission, vision, goals and objectives with appropriate strategies and measures.
 - The final workgroup documents and recommendations will be reviewed by senior staff.
- Composition
 - Tribal Representatives
 - Area and Service Unit Representatives
 - Headquarters Office staff
 - Senior staff

Workgroup Update: Timeline

- Five meetings starting in November and continuing through January.
- Based on feedback from the workgroup members, additional time/meetings have been added to the workgroup schedule.
- Anticipated workgroup completion in January 2018.
- There will be a 30-day public comment period on the draft Strategic Plan.
- The final IHS Strategic Plan is expected to be completed in April 2018.

Website Updates

The screenshot displays the Indian Health Service (IHS) website. The header includes the IHS logo, the text "Indian Health Service" and "The Federal Health Program for American Indians and Alaska Natives", a search bar, and navigation links for "A to Z Index", "Employee Resources", and "Feedback". A secondary navigation bar contains links for "About IHS", "Locations", "for Patients", "for Providers", "Community Health", "Career Opportunities", and "Newsroom". The main content area shows a breadcrumb trail: "IHS Home / The Division of Planning, Evaluation, and Research / Planning / Strategic Planning". On the left is a sidebar menu for "The Division of Planning, Evaluation, and Research" with "Planning" selected. The main content area is titled "Strategic Planning" and "IHS Strategic Plan 2018-2022". It states: "IHS is seeking comments on the following question and initial framework: *Do the IHS Mission, Vision, Goals and Objectives reflect the direction and priorities you feel the IHS should pursue over the next 5 years?*". Below this is the "Initial Framework" section, which includes: **Mission** - To raise the physical, mental, social, and spiritual health of American Indians and Alaska Natives to the highest level. **Vision** - A health system that promotes Tribal ownership and pride. **Goal 1:** To ensure that comprehensive, culturally acceptable personal and public health services are available and accessible to American Indian and Alaska Native people. **Objectives:**

On the right side of the page, there is a "Comments" section titled "Comments" with an information icon. It contains the text: "A summary of recent comments are available for review." Below this text is a list of four download links for comment records:
