## Version Control

| Version   | Date          | Notes                        |
|-----------|---------------|------------------------------|
| 0.1 Draft | June 2012     | Initial SharePoint Check-In. |
| 1.0       | June 29, 2012 | Final                        |

## Introduction

The Workload reporting process utilizes various tables and views for the extract and reporting of workload data. The tables and views reside on the WILDHRSE database in schemas dedicated for this process.

## Schemas and Tables Utilized by the Workload Reporting Process

| SCHEMA | TABLE          | DESCRIPTION   |
|--------|----------------|---|
| WL     | ADA_PROC       | ADA Procedure codes data, required for the current workload reporting cycle.  |
| WL     | APC            | Direct Outpatient encounters data, required for the current workload cycle.   |
| WL     | CHSINP         | Contract Inpatient encounters data, required for the current workload reporting cycle.                                      |
| WL     | CHSOUT         | Contract Outpatient encounters data, required for the current workload reporting cycle.                                     |
| WL     | DENTAL         | Dental encounters data (direct and contract, including dental pharmacy), required for the current workload reporting cycle. |
| WL     | INPATIENT      | Direct Inpatient encounters data, required for the current workload reporting cycle.  |
| WL     | DX             | Diagnosis codes data, required for the current workload reporting cycle.  |
| WL     | PROCEDURE_DATA | ICD9 Procedure codes data, required for the current workload reporting cycle.   |
| WL     | WL_SUMMARY_P6  | Summary data for HQ reporting   |

| <b>SCHEMA</b> | <b>TABLE</b>  | <b>DESCRIPTION</b>                                 |
|---------------|---|--|
