

# National Cybersecurity Awareness Month

National Cybersecurity Awareness Month

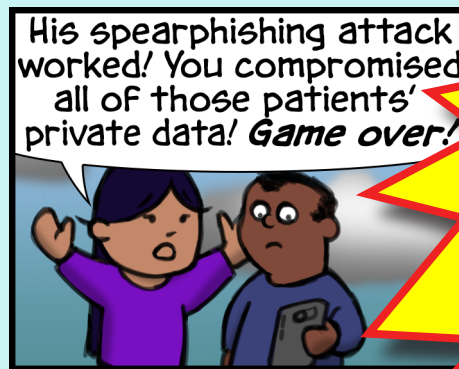

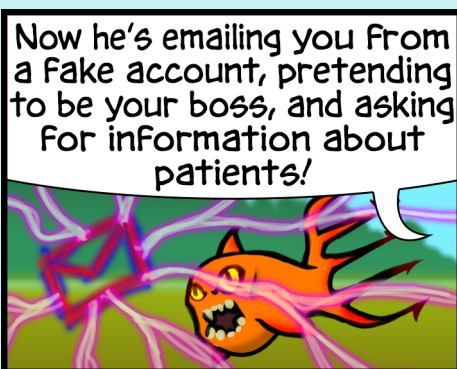

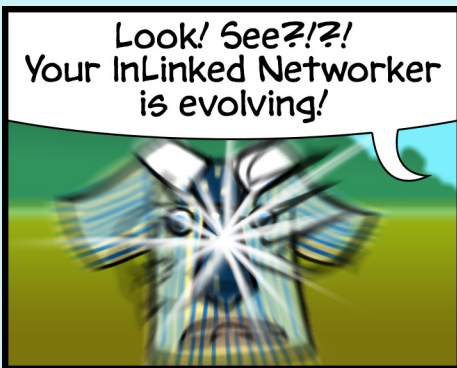

OCTOBER 2017

WEEK 1

## Online Safety: Social Engineering the Social Network

# SocialMedia GO

People like to collect friends on social media, accepting all the friend requests they receive in order to build a huge network of people. But it's not a good idea to share social networking news with people you don't know. Be careful about your post. Social engineers troll social media sites, gathering information about their targets to gain their trust and to execute spearphishing campaigns. Info about your coworkers, your projects, or your work environment can be used to craft believable scams.
