Introduction

Intentionally Blank

Introduction

Background

The Portland Area Indian Health Service provides access to health care to over 158,000 American Indians and Alaska Natives (AI/AN) throughout Washington, Oregon, and Idaho. A range of direct care services is provided to forty-two (42) tribes in the Portland Area from thirty-nine (39) health centers, thirteen (13) health stations, and three (3) urban programs. Referral services are also available through Contract Health funding. Of the health centers, twenty-nine (29) are tribally operated and ten (10) are federally operated. One of the health stations is federally operated and the remaining thirteen (13) are tribally operated. All three (3) of the urban programs are operated by tribal organizations. Each of the health centers has distinctly-defined service areas, some of which overlap.

The planning activities proposed by this scope of work are intended to analyze, justify, and design a comprehensive Portland Area Health Services Master Plan. The scope of work was based on service area populations, locations (accessibility), travel distances, workload threshold, provider capacities, space capacities, resource deficiencies, and related data. Consultation and consensus building strategies were provided by the respective Strategic Planning workgroups throughout this process.

Purpose

The purpose of this project was to develop a Health Services Master Plan to address the short- and long-term health care requirements for each service area of the Portland Area, and an overall Area Master Plan. Each Master Plan establishes the primary care and specialty care needs and describes how a comprehensive health care delivery system can be accomplished for each service area.

Consensus Strategy

Each health center established a Strategic Planning workgroup to identify and facilitate the needs for their respective health care facilities and service areas. An area-wide Strategic Planning advisory workgroup was established to facilitate the needs of the Portland Area, as a whole. Based on guidance from the Strategic Planning workgroups throughout the process outlined below, the Portland Area proposed to develop a Master Plan to address the health services and health facilities needs for the Area.

The contractor provided a Facilitator who was responsible for conducting review meetings and establishing and documenting the consensus on the Master Plan, and all issues related to consensus building. The Facilitator worked with the staff and appointed committees or workgroups at each health center and the Area. The Strategy included the establishment of partnerships or working alliances among the health centers and health stations and other entities within the respective service areas that shared common goals and missions.

The area-wide Strategic Planning workgroup was responsible for seeing that consensus was achieved. In the event that the area-wide Strategic Planning workgroup could not achieve consensus, the issue was referred to the Director of the Portland Area Indian Health Service.

The contractor's facilitator and the IHS project officer were responsible for setting up and coordinating all review meetings required for each phase.

Participants

Twenty-six (26) of the fifty-five (55) projected PSAs were included in this effort through two rounds of planning efforts, identified as Service Units/PSAs participating in Round 1 (2003-2004) and Round 2 (2004-2005). The twenty-six PSAs were split into two groups.

PSA #	Round	Group Number (Round 2 Only)	Service Unit	PSA
1	1		Colville	Inchelium, WA
2	1		Colville	Keller, WA
3	1		Colville	Nespelem, WA
4	1		Colville	Omak, WA
5	1		Makah	Neah Bay, WA
6	1		Shoshone Bannock	Fort Hall, ID
7	1		Warm Springs	Warm Springs, OR
8	1		Western Oregon	Salem, OR (Chemawa)
9	1		Yakama	Toppenish, WA
10	1		Yakama	White Swan, WA
11	2	1	Burns Paiute	Burns, OR
12	2	1	Cowlitz	Longview, WA
13	2	1	Hoh River	Hoh, WA
14	2	1	Kalispel	Usk, WA
15	2	1	NW Band of Shoshone	Brigham, UT
16	2	1	Shoalwater Bay	Tokeland, WA
17	2	1	Snoqualmie	Fall City, WA
18	2	1	Stillaguamish	Arlington, WA
19	2	1	Upper Skagit	Sedro Wooley, WA
20	2	2	Cow Creek	Roseburg, OR
21	2	2	Lummi	Lummi, WA
22	2	2	Puyallup	Tacoma, WA
23	2	2	Quileute	LaPush, WA
24	2	2	Siletz	Siletz, OR
25	2	2	Spokane	Wellpinit, WA
26	2	2	Western Oregon	Eugene, OR

Round One entailed 6 service units including 10 facilities. The scope of work covered 9 primary care service areas (PSAs: Nespelem, Omak, Inchelium, Fort Hall, Neah Bay, Warm Springs, Chemawa, White Swan, and Yakama). Each of the 9 PSA facilities is either a health center or a health station. Submittals included the 9 PSA facilities. Keller was ultimately included since Colville had initiated construction at the time of the site visits.

Round Two entailed 2 groups totaling 16 PSAs. Group One PSAs are identified in the table above, of which three received site visits. Group Two PSAs are identified in the table above, of which all received site visits.

Tribes choosing to prepare their own master plans independent of this effort were invited to submit documents for inclusion in this final deliverable. As of publishing, twelve (12) of twenty-three (23) additional service areas had submitted plans. Those plans may or may not provide detail and planning metrics consistent with the project participating service area plans. The Portland Area Office provided base-line documentation for those service areas that did not submit any plan. Tabs and Executive Summaries are provided in this deliverable for all twenty-three (23) service areas to facilitate a single comprehensive planning resource. Tabs for the Urban Programs are also provided without any Executive Summary.

Service Unit Master Plans

The Service Unit Master Plan provides a comprehensive definition of services for each health delivery program. The list of services includes currently provided services to be continued and expanded where appropriate, along with any new services to be provided. Where appropriate, the Master Plan defines how services provided at each facility may relate to a larger service network that may encompass other facilities in their respective states.

It is intended that the Master Plan for each facility establish a conceptual direction for existing and new health care services based on analysis of the community health needs, projected service area population statistics, and other pertinent data. The IHS Health Systems Planning (HSP) standards were used as part of the analysis. Where necessary "out-of-template" programs proposed for a service unit were examined and justified accordingly. For Round Two - Group One PSAs, the IHS Draft Small Ambulatory Care Facility Criteria was the primary means of completing the analysis.

The Master Plan also includes a prioritized ten-year Development Plan for each service area. The Development Plan includes a prioritized list of recommendations based on analysis of needs, projections, and other pertinent data. The Master Plan does not include projected costs and potential funding sources.

Each Master Plan is not intended to include any facility design activities.

Area Master Plan

The Area Master Plan is an assimilation of all service area Master Plans into one document. Where deemed feasible to share or regionalize any health care programs among the service units, or if area-wide services from a centralized location are proposed, these options are detailed in the Area Master Plan in the Master Plan Summary.

Desired Outcome

At the close of the Round One Kick-off meeting, participants were asked the following question: *What is your desired outcome for this project?* Results are tabulated below.

- Equitable division of limited resources with a plan for expansion of services to meet future needs.
- A comprehensive plan for our community and one for region.
- Getting IHS & Tribal programs under or located in one area, not 2 miles apart.
- To obtain a baseline of current services and a guideline for future growth direction: a list of future needs that can be prioritized as funds are available.
- Use this process to establish a projection of needed healthcare to close the gap between Native Americans and the rest of the country.
- An acceptable representation of health care need versus Yakama Service Unit Resources such that Level
 of Need Funding may be increased; staffing may be increased; the facilities may be expanded; and health
 care delivery levels will be increased. In short, I want same day appointments with minimum (less than
 30 minutes) wait times.
- Provide basis for future projects and priorities for these projects.
- Develop a master plan for our service area that can be used to provide facilities and services as budget allows.

The Portland Area Health Services Master Plan Introduction

- A planning document with all of the numbers in black and white so that people can make informed decisions regarding health care for tribal management. Klamath.
- Tribes that take ownership of the master plan.
- The ability to make decisions in the next 10 years based on data to meet the priority of needs.
- A final document that will determine health care needs for future patient care.
- For PAO / Headquarters to see that we need more providers (and then fund them)!
- More funding for health in Indian Country, the minority of minorities.
- Realistic determination of service unit funding / staffing needs.

At the end of the Round Two Kick-off meeting, participants were also asked the following question: *what are your hopes for this project?* Answers were to be written on the back of their meeting evaluation sheet due to time restrictions in the meeting as a result of extended discussion on other matters. However, no responses were included.

Process

This report land is the last step in the development of the Portland Area Health Services Master Plan. An integrated schedule detailing the steps in Round One & Two is shown below.

THE INNOVA GROUP

IHS/	Trib	es	/Urb	an	
-					

To the following steps/meetings have been conducted as part of the Health Services Master Planning effort:

- Step One: *Kickoff Meetings* for Round One & Two
- Step Two: *Site Visits* for each of the Primary Service Areas (PSA) in Round One and those specified in Round Two.
- Step Three: Service Area Review Meetings supported by analysis of three years of RPMS and CHS data (2000-2002) resulting in Deliverables and supporting meetings in both Round One & Two.
- Step Four: **Draft Master Plan Discussions** supported by population based market projections by product line. The effort documented existing workloads, comparing them to National and IHS standards for the population, forecasting the key characteristics required for each service. From this documentation, a PSA/consultant team worked at each site (with the exception of specified Round Two- Group 1 PSAs) to draft a Service Delivery Plan.
- Step Five: *Final Services Review Discussions* were held for Round One & Two PSAs to compare existing resources to required, and develop priorities for integration into the master plan.
- Step Six: *The Draft Services Master Plan*, or pre-final review was held September 8, 2005 in Portland, Oregon to summary data and review remaining issues.

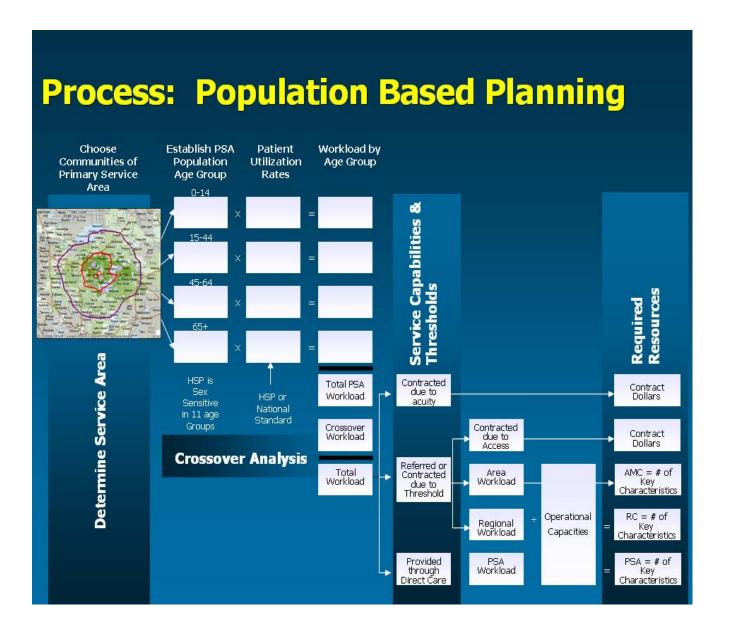

This document represents seventh and final step in the overall process: *Final Services and Master Plan Review*.

The Portland Area Health Services Master Plan Introduction

Methodology

Health Care is a population-based business. The goal of this exercise is to allow the PSA planning teams and the Health Service's Work Group to view the complexity of the health care industry in such a way as to allow each service to be considered at its simplest element. We define that element as a Key Characteristic. Key Characteristics are typically the most expense attribute to a service and range from Dental Chairs to Providers to FTEs. Making decisions along the way, based on these Key Characteristics, allows us in the end to define a Delivery Plan per Service. That Delivery Plan mandates the Required Resources. Required Resources as indicated below can include: Contract Health Dollars, Key Characteristics, Staffing and Space. These resources can be located locally, regionally or Area-wide in accordance with the Delivery Plan. The process utilized for each product line is illustrated below.

Glossary of Terms

The Master Planning process is an extensive multi-month process that employs its own terminology, one not always known to all document users or process participants. The terms below are defined in an attempt to give some help in understanding how these terms are generally used, verbally as well as within the deliverable documents.

Additional Services	Medical or Healthcare support services offered that are typically not provided for by IHS. These services are usually tribal and hold no IHS supported planning metrics or thresholds.
Alternative Care	Alternative rural or urban hospitals within 90 miles of a Primary Service Area. These are profiled in the first phase of the Master Planning process as part of the PSA deliverable.
Area	The IHS consists of 12 large geographic and/or tribally organized administrative units responsible for the planning and provision of healthcare within each of their Service Units.
CHS	Contract Health Services. Healthcare services that must be purchased from Non-IHS providers, based upon threshold issues or high acuity. These are generally facility and professional services of greater scope and intensity than are available through IHS facilities and providers.
CHSDA	Counties defined all or in part as the Contract Health Services Delivery Area. To receive CHS payment for needed services outside of the IHS delivery system, a Native American must reside within this area.
Crossover	(See also "Migration"). The natural tendency for some people to crossover/migrate outside their area for healthcare. <i>Negative or "Out"</i> <i>crossover/migrate</i> : service areas where more visits from their user population seek care elsewhere, than where other service area user populations seek care at their facility. <i>Positive or "In" crossover/migrate</i> : where more other service area user populations seek care at their facility service areas than where their service area user populations seek care elsewhere.
Deliverable	A specific planned report from The Innova Group given to the Master Planning workgroup, Area Office and/or PSA. These are published in a small number of binders as well as on the web for PSA download and printing as needed.
Defining Characteristic	The recognized significant component of a discipline's ability to deliver care (e.g.: physician, radiology room).
Discipline	A specific medical specialty (e.g.: primary care, dentistry or radiology).
Existing Delivery System	A table of medical services presently offered by access distance.
HSP	Health Systems Planning process software. The computer application that manages the IHS tool for the planning, programming and design of health facilities.

October 1, 2005

	. <alt20< th=""></alt20<>
IHS/Tribes/Urban Oregon/Washington/Idaho	The Portland Area Health Services Master Plan Introduction
Historical Workload Analysis	The past workload generated by a PSA's communities. This workload reflects an average number over a 3 year period by service line. It is not countable for CHS purposes when the payor is a third party. This measure is typically visits but varies by service.
IHS	The Indian Health Service (IHS), an agency within the Department of Health and Human Services, is responsible for providing federal health services to American Indians and Alaska Natives. The provision of health services to members of federally-recognized tribes grew out of the special government-to-government relationship between the federal government and Indian tribes.
Justification	Used within the context of whether or not workload, criteria and market assessment "justify" the placement of resources or services at an identified location.
Market Assessment	A part of the Delivery Plan report wherein a PSA's historical 3 year workload is compared to the United States National Average (USNA) workload understanding for an identical non-native population number, and the HSP understanding of expected workload for an identical native population number. The largest of these three is typically carried forward to the Delivery Plan as a planning assumption.
Market Share	The percentage of the user population from a specific community that is expected to be served at a facility for a specific discipline.
Migration	(See also "Crossover"). The natural tendency for some people to crossover/migrate outside their area for healthcare. <i>Negative or "Out"</i> <i>crossover/migrate</i> : service areas where more visits from their user population seek care elsewhere, than where other service area user populations seek care at their facility. <i>Positive or "In" crossover/migrate</i> : where more other service area user populations seek care at their facility service areas than where their service area user populations seek care elsewhere.
Patient Utilization Rates	The annual healthcare demand a single patient has for a discipline.
Payor Profile	An analysis of the payor mix for a Service Area, typically focusing on Medicare, Medicaid, Veterans and other third party payors that may or may not affect the Service Area's ability to raise third party billing thereby increasing revenue.
Primary Care Service Area	A group of communities and its population for which, at a minimum, the primary care disciplines are being planned and resourced. Referred to as the PSA.
RRM	Resource Requirements Methodology: The IHS staffing methodology.
Regionalization/Referral Partners	The grouping of workload from different PSAs for the purpose of stretching resources and improving access. A region may be as simple as a referral pattern among facilities creating effective leverage to purchase commonly needed services, or it may be a facility where on site resources are justified and can be offered to one or more PSAs thereby stretching CHS dollars.

IHS/Tribes/Urban	The Portland Area Health Services Master Plan
Oregon/Washington/Idaho	Introduction
RPMS	Registered Patient Management System: the IHS standard Patient record system that forms the data basis for the master planning process.
Resource Allocation	Analysis that follows the Delivery Planning phase. This focuses on the capacities exceeded by Delivery planning decisions, documenting shortfall and need. Resource deficiencies identified and documented include providers, rooms, staff, square feet, and CHS dollars.
Service Area	The communities and its population intended to be supported by a specific discipline's resources.
Service Delivery Plan	Analysis that follows the Regional Analysis and Services Stratification Report. This plan is final component of a report that includes the historical workload and market assessment pieces as well. The Delivery Plan assigns a projected workload assumption to a specific delivery option for approximately 120 service lines. Options typically include one of the following: delivery on-site, delivery through a Visiting Professional on-site, purchase care through CHS dollars, referral to the Service Unit for consideration, referral to the Region for consideration, or referral to the Area for consideration.
Service Access Distribution Template	A table of medical services, either desired or planned, detailing services offered by access distance.
Service Population	The IHS understanding of the number of Native Americans living within a county which may or may not be users. Census based and projected into the future. Primarily used for growth projection and market opportunities.
Service Unit	An administrative unit overseeing the delivery of healthcare to a specific geographic area. May consist of one or more facilities, Service Areas, or PSAs.
Threshold	The minimum workload and/or remoteness necessary to justify the provision of a specific discipline.
Travel Distance	The distance a User has to travel from his home to a facility to receive care.
User	A Native American that has received or registered to receive healthcare in the past three years.
User Population	The number of Active Indian Registrants in the healthcare system from a specified area.

Small Ambulatory Care Criteria (SAC)

In order to provide consistent appropriate health care to remote Native American communities, the Indian Health Service relies on a number of standard tools to distribute resources based on a community's population and medical workload. The standard tools, the Resource Requirements Methodology (RRM) and the Health System Planning software (HSP) do not adequately address communities of less then 4,400 primary care provider visits (PCPVs). Typically this is a population of approximately 1320 Active Users.

The Small Ambulatory Care Criteria was developed as a means of understanding and planning for needs in such communities as mentioned above. Most maps in this Master Planning document utilize a population number threshold based upon the Small Ambulatory Care Criteria developed by IHS. The numbers relate directly to typical delivery systems ranging from a Small Health Clinic down to a Health Location. The table below identifies the significance of each number and what facility might be justified for consideration at such a level.

User Population	Facility	Staffing & Service Concept
900-1319	Small Health Clinic	A Physician utilized between 70 – 100%. Two Dentists or a Dentist and Hygienist at all times
588-900	Large Health Station	Minimal facility to allow One full time dentist work with a medical provider 3 days a week.
256-587	Medium Health Station	Minimal facility that allows dentist to work 4 days a week and medical provider 2.5 days/week. One full time Public Health Nurse and Contract Health Clerk.
138-275	Small Health Station	Minimal facility that allows dentist to work 3 days a week and medical provider 2 days/week
0-137	Health Location	Minimal facility with visiting providers less then one day per week.

Small Ambulatory Care Application to Portland Primary Service Areas

A table detailing application of the above criteria to Portland Area PSAs is found on the following page. The Portland Area contains a significant percentage of populations and projected workload that is best considered under SAC to facilitate right-sizing of each plan. If the PSA was not suitable for SAC application the SAC Clinic Model Consideration is left blank. However, if the PSA was suitable for SAC application the SAC Clinic Model Consideration columns identify which specific model was utilized. A criteria completion section on the right hand side of the table shows the process forward for completion of SAC planning.

Note: Other criteria must be applied to justify consideration for a small ambulatory care facility. Standard planning scenarios would apply to populations and PCPV ratios greater than represented in the table above. Consult the PSA specific delivery plan for detail.

Note: Identification in this table is a starting point for SAC application. For application decision please consult the actual PSA Plan. Gray row signifies tribe/facility/PSA outside scope of work.

Master Plan Summary

Intentionally Blank

Master Plan Summary

The Master Plan Summary consists of 7 key components:

- User Population Summary
- On-Site Service Summary
- Regional Delivery Plan Summary
- Contract Health Summary

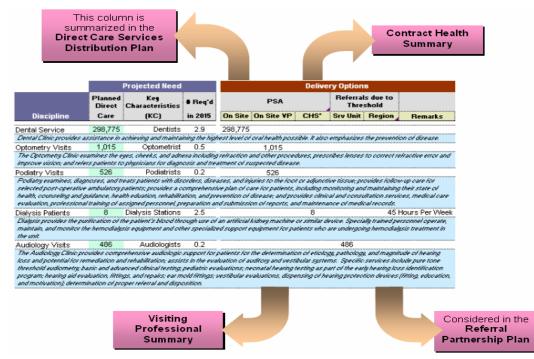

- Staffing Summary
- Space Summary
- and Priorities

These items document the plan, services and resource allocations developed over the course of our effort and conversations. Each of these components has their own purpose and is integral to understanding the complete Master Plan requirements for the Portland Area.

The **Primary Service Area Delivery Plan**, which is not in the Master Plan Summary, is the basis and starting point of the Master Plan and this Summary. These documents are stand-alone documents behind each PSA's tab.

A Primary Service Area (PSA) is defined as a logical grouping of communities based on proximity for which healthcare resources are planned and distributed.

The population demographics of a PSA determine what services are appropriate. A medical workload and key characteristics need projection was provided based on the projected 2015 demographics. This information was reviewed and discussed with Service Area leadership in order to determine the best delivery options.

PSA resource needs, priorities and future on-site services were identified and summarized in the **On-Site Service**, **Contract Health**, **Staffing** and **Facility Size Summaries**. As a result of the Primary Service Area decisions, Portland Area Office and tribal input, Regional Partnership opportunities were also developed on a conceptual level.

The **Master Plan Priorities** section organizes each PSA's priorities alphabetically for easy reference by the Area.

User Population Summary

The Area-wide **User Population Summary** is shown on the following page. These populations form the basis for all Service Delivery Plans and the resulting Summaries mentioned above.

- The Round One PSA user populations (indicated by the blue shaded headers) reflect a projection from the 2001 User Population based on the communities assigned to each Primary Care Service Area as developed during the process.
- The Round Two PSA user populations (indicated by the green shaded headers) reflect a projection from the 2002 Portland Area Office/PSA negotiated or "understood" populations. These Round Two populations were adjusted according to accepted service population growth rates to align with the Round One 2001 numbers to form a common baseline for the market assessment and delivery planning phases of the effort.

The communities selected for each Service Area are identified on the executive summary page of each PSA Delivery Plan. 2015 is the baseline projection year for the Master Plan. Population growths are based on IHS's annually published County Service Populations. There are a few noteworthy items to consider when reviewing the table:

- New PSA opportunities (Eugene, Portland, and Multi-Tribal) and their populations are not included in Service Unit totals or the Area Wide totals. This is so because communities for each of these were often included in existing service areas as well (ex: Multi-Tribal communities are included in Warm Springs and Yakama service areas). As a result, should any of these new PSA opportunities be forwarded by an interested tribe, the affected service area populations should be adjusted accordingly.
- Chemawa shows 2 significantly different populations, a projection dilemma closely related to the point above. Chemawa's population projection would be affected rather dramatically if the Portland New PSA or the Eugene PSA were forwarded. Communities were assigned to Chemawa for planning purposes in Round 1 without full consideration of all potentially affected PSAs as part of the process. As a result, Chemawa should be aware of the significant variance between the low end of a 2015 projection (3,267) if all the new PSAs are developed, and the high end of a 2015 projection (7,128) if no new PSAs are developed.

The future facility type is identified for each Service Area.

The User Population growth is indicated and ranked for Service Areas and Service Units within the Portland Area. However, the column titled *"User Pop Growth %"* tracks a Round 2 understanding at the Service Unit level, but a Round 1 or Round 2 understanding at the PSA level, depending on which round the PSA participated in. For example, Colville's typical PSA growth as understood in Round 1 ranges from 9.5% to 21.4%. The service unit growth, however, is shown as 35.9% because it looks at the Round 2 2001 user pop in relationship to the 2015 user pop.

User Populations for independently prepared plans

Service Areas preparing independent plans are shown in the table along with their current and projected user populations for reference only. Further analysis on these is not provided beyond provision for inclusion of their documentation in this deliverable along with executive summary interpretation of their documentation. User populations from independently prepared and submitted plans are not reflected in this table though they are shown (in red) in all summary tables. Such populations may or may not have utilized methodologies consistent with project participant PSAs.

For additional information on user populations methodologies, updates and community assignments please consult *Appendix A – User Population Updates* and *Appendix D – Service Area Community Assumptions*.

	l		Revised baseline planning assumptions (see Update)

New PSA Populations not counted in totals since they are also included in existing PSAs

On-Site Service Summary

The following pages provide a holistic view of the direct care services and their distribution in the year 2015. The Regions or Partnerships of Care are not intended to change IHS Service Unit boundaries and in many ways already reflect today's referral pattern. They Regional Partnerships do not identify specific services. However, potential services are identified in the **Regional Plan Summary**. All partnerships are suggestive.

The **On-Site Service Summary** is a summary and abbreviation of the services offered and supported at your local Primary Service Area, as well as a conceptual alignment of PSAs into partnerships to offer Area Wide and Regional services. This document is a result of the PSA and conceptual Regional and Area Delivery Discussions. The document is organized by Region and by PSA. New services anticipated in the plan are shown in red font, while existing services are shown in black font. Detailed resources and fully outlined anticipated services are found in the individual PSA documents. An absence of identified services indicates no submission of master planning data from non-participating tribes as of publishing date.

Independently prepared service area plans are identified with an asterisk (*). Services listed under such service areas utilized nomenclature consistent with this planning document.

The Portland Area Health Services Master Plan

Intentionally Blank

Regional Plan Summary

Oregon/Washington/Idaho

Developing a Regional Plan can be accomplished either by a "bottom-up" or a "top-down" approach. This final report offers both perspectives.

- The **Regional Delivery Plan Summary** is comprised of two summary tables detailing requests for services as identified in PSA delivery plans: **the Regional Visiting Professional Summary** and the **Regional Referral Summary**. Together these represent a "bottom-up" approach. In short, local PSA delivery plans are requesting these providers/referrals.
- The **Regional Opportunities Summary** is driven by suggested groupings of PSAs/populations to support shared services of potential benefit to all tribes. These groupings are not the result of formal requests by the tribes as a result of face-to-face conversations. Rather, they are suggested by populations. The *Regional Center* and *Area Wide Medical Center* concepts are driven by "at-large" interest from Portland Area Service Areas, the Portland Area Office and the Northwest Portland Indian Health Board. This represents a "top-down" approach. In short, local PSA delivery plans might benefit from these partnerships.

Regional Delivery Plan Summary

The **Visiting Professional Summary** identifies visiting providers that each PSA has written into their delivery plan. Service areas have been grouped by potential partnerships rather than by Service Unit to allow maximum exploration of sharing visiting services to stretch CHS dollars. The picture is not decisive for any partnership or Service Unit based upon existing evidence. However, tribes may wish to speak to others in reasonable proximity to see if additional visiting needs might create benefit for sharing of services.

Visiting Providers suggested by independently prepared master plans are added to the table to suggest greater opportunities for partnership that tribes may wish to explore either on their own or as a response to suggestion from area office staff. Those tribes that prepared plans independent of this effort are identified in the table by pink shading. The providers requested are identified by an "X" since those plans did not identify the FTE count for each.

The **Regional Referral Summary** identifies those service lines that each PSA desired some kind of regional solution for. These lines are typically paid for either by tribal or CHS dollars and as a result strain the resources of local delivery systems. There are additional challenges of bed availability, access, and wait times. The table, by virtue of its organization, identifies clusters of requested beds. But the overall number is important to note since it issues a clear "grass-roots" call for one or more regional centers offering:

- Adult Residential Substance Abuse Care (48.3 Beds);
- Adolescent Residential Substance Abuse Care (15.1 Beds).

These requests are embedded into the local delivery plans and could be pursued either by interested tribes or the Portland Area Office.

The Portland Area Health Services Master Plan Regional Referral Summary Regional Referral Summary

0 = services desired but low workload fails to produce Provider Count

Oregon/Washington/Idaho

Regional Opportunities Summary

The Regional Opportunities Summary suggested by the On-Site Service Summary is shown in detail on the following pages. It represents a scenario first presented at the Area Analysis meeting of Round One as well as the Service Area Review meeting of Round Two. It views potential partnerships as existing on 4 levels above the Primary Care Service Area. These partnerships are not intended to remove services from local clinics, but rather stretch CHS dollars by providing services where populations will support them. Please note:

- Level 1 & 2 populations reflect Round 1 & 2 PSA delivery plan projections.
- Level 3 & 4 populations reflect only Round 2 user population projections.

The level 3 and 4 partnerships were further refined into 3 Regional Center concepts and 1 Area Medical Center concept. This development is supported both by the partnering populations as well as a resolution by the Northwest Portland Area Indian Health Board in July 2005 to include 3 Regional Centers and 1 Area-wide Medical Center in the Portland Area Health Services Master Plan. Conference calls including tribes from across the Portland Area evaluated the potential of each of these level 3 & 4 partnerships.

Partnerships are built from the Service Delivery Plan referral conversations at each site visit as well as the natural grouping of populations for mutual service area benefit as appears appropriate to date in the planning process. It supports the following potential opportunities among willing partners:

- Eleven (11) *Level 1* Regional Referral Partnerships each clusters of two or more PSAs for mutual benefit, with user populations ranging from 2,667 to 26,396.
- Four (4) *Level 2* Regional Referral Partnerships each clusters two or more Level 1 Partnerships for mutual benefit, with user populations ranging from 6,305 to 44,610.
- Three (3) *Level 3* Regional Referral Partnerships (<u>Regional Centers</u> as presented at the Northwest Portland Area Indian Health Board Meeting in July 2005 and supported by a resolution, further refined through conference calls discussions participated in by interested tribes) each clusters Level 1 and Level 2 Partnerships, with user populations ranging from 26,898 to 59,186.
- One (1) Level 4 or Area Wide Partnership serving 130,341 total users (<u>Area-wide Medical</u> <u>Center</u> as presented at the Northwest Portland Area Indian Health Board Meeting in July 2005 and supported by a resolution, further refined through conference calls discussions participated in by interested tribes).

The **Regional Summary Map & Populations** table following illustrates how these multi-level partnerships might work with the resulting populations below.

The **PSA Alignment Table** following links each partnership to specific PSA alignment. Again, the populations are provided to show how opportunity builds.

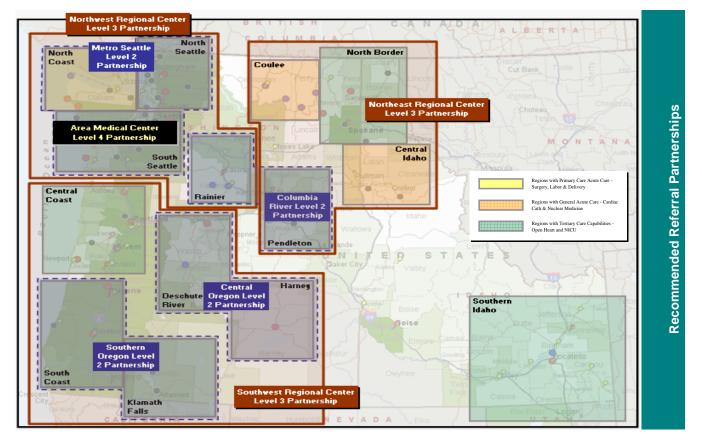

Oregon/Washington/Idaho

Regional Summary Map & Populations

(2 Hour Referral Partnership Concept)

The graphic above groups various Primary Service Areas into larger populations that would create the potential for significant leverage in both owning certain services at appropriate regional centers, as well as negotiating higher level care. Such care would be negotiated by the Partnerships as deemed most beneficial for those PSAs involved. Referral Partnerships as pictured above contain population projections consistent with the Round 2 understanding despite the fact that many PSAs are outside this scope of study.

For ease of reference the combined numbers are presented below. Level 3 & 4 populations (Regional Centers and Area Medical Center) rely on Round 2 2015 user population projections only.

Level 2		Partnersh	nips Level 3	Level	4

Regional Definition & Detail

The Workgroup, in the initial questionnaire and at the Kick-Off Meetings for Round One and Two, suggested that a regional service area should be:

- 1. a 2 hour drive time to services, offers reasonable and shared travel expectations
- 2. an area that pools resources,
- 3. a common source of reasonable access to basic core services.
- 4. provides benefit that exceeds cost
- 5. expanded and increased access to specialty services
- 6. provide the potential for inpatient capability

Regional Referral Partnerships will help relate solutions to the above needs with these leading ideas concerning what a region is and what it should offer. In forming regional referral partnerships a larger population is created, attracting a wider segment of specialized providers. Referral Partnership would lead to the formation of significant population groupings allowing increase negotiating leverage for needed CHS care as well as the formation of comprehensive specialty clinic resources that will stretch CHS dollars. It would also lead to adopting best practices in the development and operation of these programs as well as improved communication.

When searching for regional or referral partner opportunities, it is important to consider:

- Natural and Historical Access to both direct and contract care delivery options
- Proximity to Tertiary Care Centers
- Current and future populations within the regional referral partnership boundaries
- The strength of existing IHS health care assets and strong tribal programs in the proposed regions.

The following partnerships should be considered and evaluated in order to determine maximum benefit for Portland Area tribes. The opportunities that present themselves are listed below. They are conceptual in nature and require tribal discussion to determine whether or not the alignments are appropriate and what services are of interest to pursue as well as an appropriate path forward.

Level 1 Partnerships

The following PSAs could potentially benefit from sharing certain services. Groupings shown should be considered for appropriateness in terms of regional definitions above. Service opportunities are also shown along with the total user population served. Partnership names are for labeling purposes only.

Southern Idaho: Not-tsoo Gah-nee Health Center (Fort Hall) and NW Shoshone.

• 7,928 Users: IM, Peds, OB/Gyn, Optometry, Physical Therapy

Central Idaho: Kamiah Health Station and Lapwai Health Center

• 4,458 Users: Family Practice, OB/Gyn, Optometry, Physical Therapy

North Border: N.A.T.I.V.E, Benewah, Wynecoop, Kalispel, Kootenai

• 7,653 Users: IM, Peds, OB/Gyn, Optometry, Audiology, SA Transitional Care, Physical Therapy Coulee: Colville (Nespelem, Inchelium, Omak, Keller)

• 9,092 Users: IM, Peds, OB/Gyn, Optometry, Podiatry, Audiology, SA Transitional Care, Physical Therapy

Rainier: Yakama, White Swan

- 13,879 Users: Podiatry, Audiology, Psychiatric, Elder Care, Microbiology, Radiography, Expanded Physical Therapy
- Klamath Falls: Klamath, Chiloquin

• 2,667 Users: Family Practice, Dental, Behavioral Health, Lab, Physical Therapy

- South Coast: Coquille, Cow Creek, Coos Umpqua, Eugene New PSA Opportunity (if pursued)
 - 7,094 Users: IM, Peds, OB/Gyn, Optometry, Audiology, SA Transitional Care, Physical Therapy

Oregon/Washington/Idaho

<u>Central Coast</u>: Chemawa, Grand Ronde, Siletz, Cowlitz, Portland Urban New PSA Opportunity (if pursued), NARA

• 23,865 Users: Visiting Specialists: Ortho (2). Gen. Surg. (1), Ophth. (1), Derm. (1), ENT (1), Psychiatric, Elder Care, Microbiology, Radiography, Ultrasound, Mammography, Expanded PT, Home Health.

North Coast: Quileute, Sophie Trettevick, Lower Elwha, Hoh, Jamestown S'Klallum

4,417: Optometry, Physical Therapy

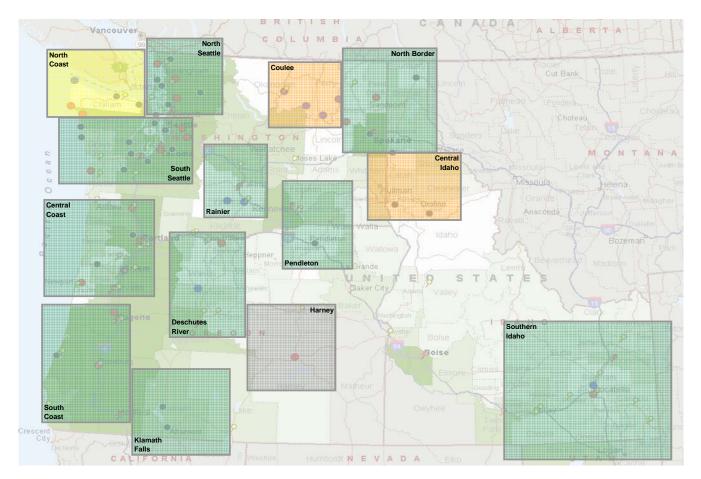

<u>South Seattle</u>: Skokomish, Chehalis, Squaxin Island, Nisqually, Roger Saux, Queets, Shoalwater Bay, Puyallup, Muckleshoot, Seattle Urban, Port Gamble, Suquamish, Snoqualmie

• 26,396 Users: Visiting Specialists: Ortho (2). Gen. Surg. (1), Ophth. (1), Derm. (1), ENT (1), Psychiatric, Elder Care, Microbiology, Radiography, Ultrasound, Mammography, Expanded PT, Home Health.

North Seattle: Samish, Stillaguamish, Sauk-Suiattle, Lummi, Tulalip, Swinomish, Upper Skagit, Nooksack

• 13,797 Users: Podiatry, Audiology, Psychiatric, Elder Care, Microbiology, Radiography, Expanded PT

Below is a conceptual map of the partnerships indicated.

Oregon/Washington/Idaho

Level 2 Partnerships

Four Level 2 groupings are proposed for consideration, each one combining Level 1 partnerships identified above. Partnership names are for labeling purposes only and are subject to change as the area workgroup desires. Total users served and service opportunities are also shown.

Columbia River: Rainier, Pendleton

• 17,341 Users: Podiatry, Audiology, Psychiatric, Elder Care, Expanded PT, Home Health. Central Oregon: Deschutes River, Harney

• 6,305 Users: IM, Pediatrics, OB/Gyn, Optometry, PT, Audiology

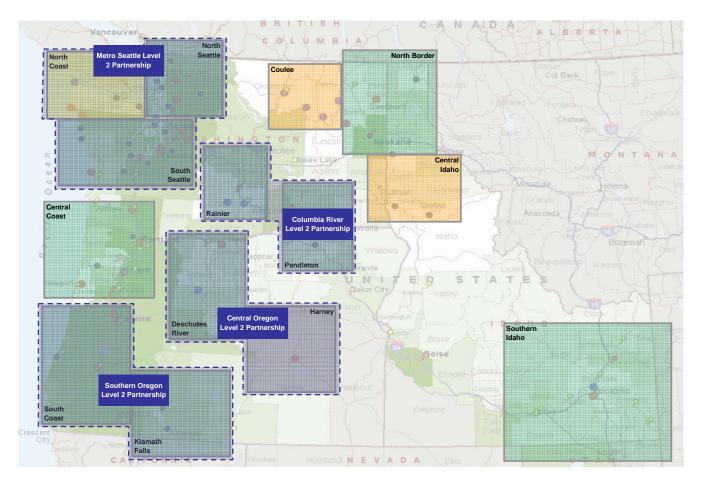

Southern Oregon: South Coast, Klamath Falls, Central Coast

• 9,761 Users: IM, Pediatrics, OB/Gyn, Optometry, PT, Podiatry, Audiology, Psychiatric, Elder Care.

Metro Seattle: North Coast, South Seattle, North Seattle

 44,610 Users: Visiting Specialists: Ortho (3). Gen. Surg. (2), Ophth. (2), Derm. (2), ENT (2), Cardiology (1), Urology (1), Neurology (1), Adult RTF, Elder Care, Microbiology, OP Surgery, Expanded D.I. (US/Mammo/Fluoro), Expanded PT, Home Health

Below is a conceptual map of the partnerships indicated.

Level 3 Partnerships (Developed as *Regional Centers*)

Three Level 3 partnerships are shown, each one grouping Level 2 and/or 1 partners together for opportunity. Again, the names assigned are for labeling purposes only.

Northeast Regional Center: Coulee, North Border, Central Idaho, Pendleton

 26,898 Users: Ortho (1.9), Gen. Surg. (1.4), Ophth. (.1.0), Derm. (1.0), ENT (0.9), Podiatry (1.9), Audiology (2.1), Psychiatry (1.6), Ultrasound (0.7 rooms), Mammography (0.9 rooms), Fluoroscopy (0.4 rooms), CT (0.2 rooms), PT (4.8 FTE), OT (1.4 FTE), Speech Therapy (0.7 FTE), Chemotherapy, OP Respiratory Therapy, Endoscopy (0.1 rooms), OP Surgery (1.1 rooms), Adult RTF (17.0 beds), Adolescent RTF (4.2 beds), Nursing Home (46 beds), Assisted Living (54 beds), Dialysis, Dental Specialists

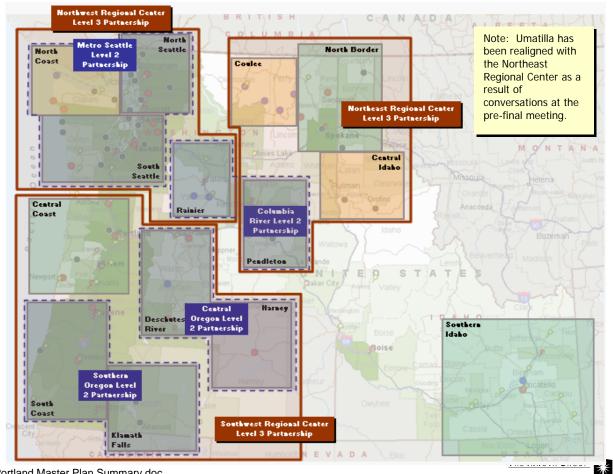

Southwest Regional Center: Deschutes River, Harney, Klamath Falls, South Coast, Central Coast

 37,007 Users: Ortho (2.5). Gen. Surg. (1.9), Ophth. (1.2), Derm. (1.3), ENT (1.2), Podiatry (2.4), Audiology (2.8) Psychiatry (2.2), Ultrasound (0.9 rooms), Fluoroscopy (0.5 rooms), CT (0.2 rooms), Mammography (1.2 rooms), PT (6.3 FTE), OT (1.8 FTE), Speech Therapy (0.9 FTE), Chemotherapy, OP Respiratory Therapy, Endoscopy (0.2 rooms), OP Surgery (1.4 rooms), Adult RTF (22.5 beds), Adolescent RTF (6.2 beds), Nursing Home (56 beds), Assisted Living (65 beds), Dental Specialists

Northwest Regional Center: Rainier, North Coast, South Seattle, North Seattle

 59,186 Users: Ortho (4.0). Gen. Surg. (3.0), Ophth. (1.9), Derm. (2.1), ENT (1.9), Podiatry (3.5), Audiology (4.5) Psychiatry (3.5), Fluoroscopy (0.8 rooms), CT (0.4 Rooms), PT (9.7 FTE), OT (2.8 FTE), Speech Therapy (1.4 FTE), Chemotherapy, Respiratory Therapy, Endoscopy (0.3 rooms), OP Surgery (2.2 rooms), Adult RTF (35.2 beds), Adolescent RTF (10.2 beds), Nursing Home (79.2 beds), Assisted Living (93.2 beds), Dental Specialists

Below is a conceptual idea of how the Regional Centers (Level 3 Partnerships) Services Areas.

Oregon/Washington/Idaho

An alternative way to visualize these Regional Center services is shown below.

The relative approximate potential market for each Regional Center is identified below: the Service Population by county for 2015 that might access such care if available.

Regional Center	Projected User Pop	Projected Market (Service Pop)
Northeast RC	26,898	32,628
Southwest RC	37,007	66,871
Northwest RC	59,186	98,015

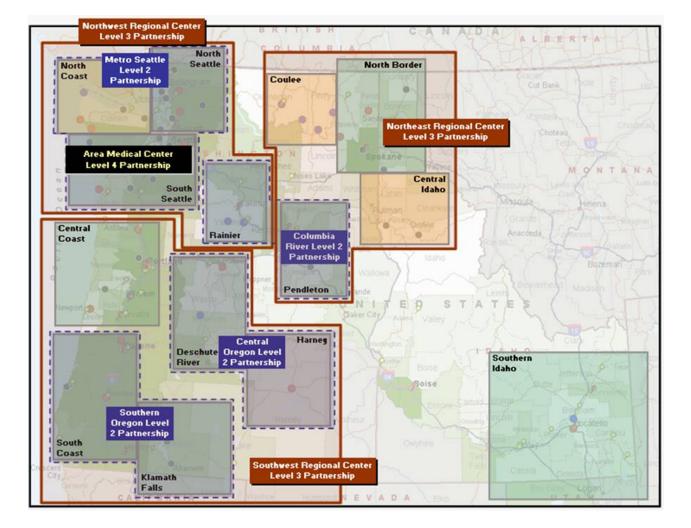

Level 4 Partnership (developed as an Area Wide Medical Center)

In addition to the services listed above, the Portland Area could benefit from certain services if the entire projected user population was considered. This would anticipate a user population of 130,341 and would support the following services:

Services:

- Cardiology (2.2 FTE)
- Urology (2.2 FTE)
- Neurology (2.7 FTE)
- Allergy (2.0 FTE)
- Pulmonology (1.0 FTE)
- Gastroenterology (2.0 FTE)
- Oncology (1.0 FTE
- Pediatric Beds (11 Beds)
- Medical Beds (41 Beds)
- Surgical Beds (22 Beds)
- Intensive Care Beds (18 Beds)
- Psych Beds (10 Beds)
- Detox. Beds (2 Beds)

- Sub-Acute Trans. Care (29 Beds)
- Total Inpatient Beds = 132 Beds
- Microbiology (7.3 Techs)
- Anatomical Pathology
- IP Respiratory Therapy
- MRI (1.0 Rooms)
- Nuclear Medicine (3.0 Rooms)
- Inpatient Surgery (2.0 Rooms)
- Hostel
- Radiologist

Contract Health Summary

The **Contract Health Summary** is a direct result of the PSA Delivery Plan. The amount of contract health dollars required for a Service Area is based on service-by-service affordability of direct care and the availability of local contracting options. For example, a service area without local contracting options is more likely to be interested in the synergies of regional care then a community with a non-IHS facility across the street. This reality was discussed at the PSA levels by service. If contract health dollars for a service was determined most desirable for a PSA, that service's workload multiplied by a cost per workload unit was included in the lump sum total Contract Health Dollars for a Service Area. Simply dividing that total dollar requirement by the PSA User Population provides us with a planning number of CHS dollars per User specific to that PSA.

The Contract Health Summary Sheet on the following pages indicates a relative breakdown of contract health reliance by Service Area. The Fiscal Intermediary (FI) for the Portland Area provided costs per workload as an average for the entire Area. Regardless of the local healthcare competition and economy, these average costs are used for all Service Areas. The roll-up to the right indicates a greater CHS reliance for the smaller communities with a limited number of direct care services.

Cost of living or competitive rate adjustments can be made to the consistent projection made to the right.

Due to the current IHS CHS regulations, user populations living outside a Contract Health Service Delivery Area (CHSDA) as well as non-local tribal user populations living within the CHSDA but off the reservation are not eligible for CHS payment for care. Therefore, we have differentiated the total CHS need from the total CHS eligible need. The total need column reflects the need regardless of CHS regulations, while the total CHS eligible need is based on the CHS eligible population only. The CHS eligible population percentage utilized was provided by the participating tribes.

The Totals are shown on three lines at the end of the table. The first total shows all PSA need with the exception of the New PSA Opportunities. The second total shows all PSA need with the exception of the Urbans. The third total shows just the New PSA Opportunity need.

The Summary is unable to show comprehensive need due to incomplete critical data from one of two sources:

- Service Areas that opted to prepare plans independent of this process whose plans lacked detail required to complete this summary table
- Service Areas that opted to prepare plans independent of this process who have not submitted by the time of this deliverable.

This is limiting when drawing conclusions at a Service Unit and Area Wide level. Service Units where totals are not reliable due to absentee data are highlighted.

For further detail on the unit cost information please consult Appendix C - CHS Cost Calculations.

Staffing Summary

The Staffing Summary indicates four staffing numbers summarizing existing and future needs.

- Existing Total Positions (ETP)
- Existing Reoccurring Positions (ERP)
- 2015 RRM Staffing Projection (2015 Need RRM)
- 2015 Total Staffing Projection (2015 Need Total)

Based on these numbers, four comparisons of existing positions to future staffing needs in 2015 are offered.

First (see Column marked "1"), a comparison of Existing Total IHS positions (ETP) to required IHS RRM (un-deviated RRM) generated positions in 2015 (Existing Total Positions to RRM) expressed as a percentage and total. The forecasted percentages are related to the specific PSA Delivery Plans established as part of this effort. The required number does not include tribal positions nor does it include grant funded programs. These were excluded only for this comparison process; the delivery plan provides detail to service line distribution of staffing, IHS, grant and tribal. They are not labeled as such, as in 2015, it is unknown who will be operating and funding each program.

Second (see Column marked "2"), a comparison of the ETP to Total Staff Required or Total Need expressed as a percentage and total. This compares existing staff, regardless of funding source to the RRM generated (un-deviated) staffing requirements combined with services IHS has typically supported, such as WIC, EMS, and Transportation etc.

Third (see Column marked "3"), a comparison of Existing Recurring Positions (ERP) to required IHS RRM (un-deviated RRM) generated positions in 2015 expressed as a percentage and total. The recurring positions represent those positions funded only by recurring Hospital and Clinic (H&C) funds. The H&C funded positions are provided where information was provided from the tribes through the area office. Where no provision was made no comparison is offered.

Fourth (see Column marked "4"), a comparison of Existing Recurring Positions (ERP) to Total Need -RRM generated (un-deviated) Staffing requirements combined with services IHS has typically supported, such as WIC, EMS, and Transportation etc. expressed as a percentage and total.

The Totals are shown on three lines at the end of the table. The first total shows all PSA need with the exception of the New PSA Opportunities. The second total shows all PSA need with the exception of the Urbans. The third total shows just the New PSA Opportunity need.

The Summary is unable to show comprehensive need due to incomplete critical data from one of two sources:

- Service Areas that opted to prepare plans independent of this process whose plans lacked detail required to complete this summary table
- Service Areas that opted to prepare plans independent of this process who have not submitted by the time of this deliverable.

This is limiting when drawing conclusions at a Service Unit and Area Wide level. Service Units where totals are not reliable due to absentee data are highlighted.

Space Summary

The **Space Summary** indicates a comparison of existing IHS maintained space (MI&E) to required space. The required space counted includes space for functions that IHS would typically include in the construction of a new facility. This would include all IHS functions, grant funded programs, and tribal programs to include outpatient substance abuse counseling, EMS, WIC, Family Planning, Community Health Representatives and others. Typically IHS will not build Tribal Health Administration, Nursing Homes, Outreach Elder Care or Substance Abuse Transitional Care. Substance Abuse Residential Treatment Centers come from a different funding source and were also excluded from this count.

The summary also offers a Total Project Cost comparison. The Project cost is significantly more than the Construction cost and includes design fees, permits, licensing, equipment, furnishings and so forth.

Similar to the Staff Summary, the delivery plan provides detail for required service line distribution of space for all programs.

The Totals are shown on three lines at the end of the table. The first total shows all PSA need with the exception of the New PSA Opportunities. The second total shows all PSA need with the exception of the Urbans. The third total shows just the New PSA Opportunity need.

The Summary is unable to show comprehensive need due to incomplete critical data from one of two sources:

- Service Areas that opted to prepare plans independent of this process whose plans lacked detail required to complete this summary table
- Service Areas that opted to prepare plans independent of this process who have not submitted by the time of this deliverable.

This is limiting when drawing conclusions at a Service Unit and Area Wide level. Service Units where totals are not reliable due to absentee data are highlighted.

* Total Project \$ Need reflects an approximate total project cost, including but not limited to Design Fees, Permits & Licensing, Equipment & Furnishing, etc. This methodology does not consider location of the factility, special site cost, or utility costs.

Priorities

All master plans need to have a statement of priority. Resources for capital and operational expenditures are consistently limited. Clear priorities are necessary for the development of a reasonable, supportable and attainable master plan. Each PSA has a developed set of priorities within their Service Area. These are reflected in the following two page summary for the Portland Area as a whole. However, they do not reflect any order due to weighted ranking criteria.

Priority Criteria Development Background

Clear priorities are arrived at through the consistent application of mutually agreed upon criteria reflecting the concerns and support of all interested parties whom the master plan will impact. Priority criteria were developed early in the process, both in Round One and Round Two, in anticipation of broad tribal representation later in the planning process. Participants were asked to respond to the following question through a series of brainstorming sessions:

What characteristics of a service area should dictate their level of priority relative to future expenditures?

The following 5 characteristics and supporting criteria factors resulted from both rounds of early discussion.

Areas with inadequate care & potentially high user population

- Ratio of User Pop to Existing Providers
- Ratio of User Pop to Existing Space
- Unmet Need
- Deferred Services
- Lowest Healthcare Services to Population Ratio
- Population Age/need based
- Number of People to Serve
- Enrolled Members

Limited Access to Basic (Core) services

- Basic Services
- Access to Basic Benefits Package (Direct, CHS, Other)
- Poor Access

• Availability of Services in a respective area

Distance to Care / Remoteness

- Remote Areas (by User Pop)
- Least Access to Care
- Remote Locations
- Remoteness

Areas with Low Level Funding

• (No sub-points available)

Health Status

- Health Status
- Status of Healthcare situation in that community
- Need
- Morbidity / Mortality Rates

Despite original project intent, no formal scoring or weighting process was ultimately developed due to insufficient representation by Portland Area tribes. As a result no prioritization is offered. The local PSA priorities are still in place, however, and are shown on the following page in simple alphabetical order.

The area office may still choose to employ the criteria above in some manner to guide them in listening to and prioritizing assistance to tribes as they request help.

For additional detail on this discussion see the Priority section of this deliverable.

Oregon/Washington/Idaho

Primary Service Area Resourcing Priorities - Composite

						Service A	rea Services & R	esourcing Prioriti	es			
Service Area	1	2	3	4	5	6	7	8	9	10	11	
Benewah Medical Center*	Complete Comprehensive Community Assessment	Expand hours of service	Move admin out of structure to increase space for direct care service		Build assisted living center	Add optometry service	Add ophthalmology service	Add telemedicine service	Add teleradiology	Begin planning of clinic replacement	Plan for substance abuse after care	Plan fo compr you pla
Chehalis Community Health Center*	X-ray machine	EKG, Pulmonary testing equipment	Dental X-ray equipment	Updated and expanded phone system	Expanded Alternative Therapies	Expanded secure pharmacy services	Lab services	Dialysis machine	Women's wellness space	Blood draw area	Trauma room	Recep
Chemawa Health Center	Implement Dental and Orthodonic Expansion Program. Will allow for renovation of other spaces.	Create a Replacement PJD/POR for the facility. The current facility is approximately 25% of the size required as identified in the Resource Allocation Plan.	Create Addition and Renovation PJD/POR to meet interim needs if replacement facility is proposed OR to meet growing needs if no facility is proposed.	Expand Primary Care facilities and staff.	Balanced growth of ancillary services to support growth of primary care services, including Laboratory, Pharmacy, and Physical Therapy.		Expand Preventive Care facilities and staff, specifically Public Health Nursing, Public Health Nutrition, and Health Education	Create Wellness Center to support Preventive Care services and Physical Therapy services.	Balanced growth of Administrative and Facility Support Services to support growth of all healthcare services.			
Coos Umpqua Health Center*												
Coquille Community Health Center*	Visiting Professional (Interna Medicine, Pediatrician)	I Medical Nutrition Therapy										
Cow Creek Health Center	Behavioral Health Space - Storage & Counseling	Nursing Space - Personal Office (share) + bigger space	Dental Space and Services	Lab Space - bigger/more	Exercise (Wellness) Facility - probably a new facility behind the existing one (clinic users cannot access the existing one). Wish List - Currently no place for Tm to exercise - No ability to do treadmill stress tests (lack space)	Visiting Provider space - (1) office needed	OB/Gyn Visiting Provider?	Medical Records Space (bigger space)				
Cow Creek South (new)	Begin PJD/POR process for this facility.	Initiate Primary Care Services	Provide Nursing support for PC	Provide Visiting Provider space and clinic	Lab Tech and Department Space	Health Education Staff and Space						
Cowlitz South PSA (New)	Begin PJD/POR process for new clinic	Provide Dental Services, with dentists, hygienist, chairs and space	Add Pharmacist and department space	Increase Primary Care services	Add one exam room and one office	Provide space and exam rooms for visiting professional providers	Provide nursing support (2 nurses to support PC services)	Enhance onsite Behavioral Health staff (4.5) with space and 4 offices		Provide domestic violence services and space	Establish Substance Abuse Transitional Care Service	Add A space
Cowlitz North PSA (existing Tribal Health Center)	Determine if existing facility is feasible site for larger clinic (if not begin PJD/POR process for new clinic)	Provide Dental Services, with 1-2 dentists, hygienist, 5 chairs and space	Add Pharmacist (ultimately 2) and department space	Increase Primary Care services	Add one exam room and one office	Provide space and exam rooms for visiting professional providers	Provide nursing support (2 nurses to support PC services)	Enhance onsite Behavioral Health staff (4.5) with space and 4 offices	Provide Tobacco space and staff	Provide domestic violence services and space	Establish Substance Abuse Transitional Care Service	Add A space
Eugene PSA New PSA Opportunity	Any interested Tribe apply for SAC funding with help from PAO	Submit PJD/POR when notified to proceed.										
Fort Hall - Not-tsoo Gah-nee Health Center	Secure adequate overall Primary Care Space	Increase Diabetes staff and space	Secure additional Behavioral Health Counselors, especially Alcohol and Substance Abuse	Construct and staff Wellness Center	Secure adequate Primary Care Nursing Support	Secure Physical Therapy staff and space	Increase Dental space, chairs and staffing (Dental Hygienists and Assistants)	Increase health education staff and space	Provide security staff and space	Provide expanded Primary/Urgent Care capabilities	Increase Pharmacy space	Increa Public
Grand Ronde Health Center												
Hoh Tribe	Initiate the PJD/POR Process with the PAO	Start Transportation	Apply for and Receive a Diabetes Grant /Start a diabetes program	Start a CHR Program		In 2006, establish payback plan with IHS, and regain 638 contracts for these services.	Design Maternal and Child Health Program	To establish third party billing certification systems to increase tribal control over resources	Evaluate the opportunity and risks of an EMS System	Work with school system to establish Health Career Opportunity knowledge.	Explore innovative funding opportunities to insure long term survival of clinic	
Inchelium - Health Clinic	Increase gross square meters for Visiting Professional Clinic	Provide Dental Staff increase – especially Hygienist	Optometry is needed on-site (1 FTE due to significant backlog in work)	Increase Behavioral Health Counselors – Mental Health and Alcohol and Substance Abuse	Provide Lab Staffing to support existing space	Provide Physical Therapy staffing (use existing flex space in new clinic)	Increase Administrative Support staffing in all areas (space looks good, but you may want to split due to cultural needs)	Provide facility management staff and space	Provide housekeeping staff	Provide public health nursing staff (still short on space too)		Provid
Jamestown S'Kallum Tribal Health Clinic*												
Kalispell	Complete construction of new health and wellness center. Many of the other priorities below are covered by accomplishing this task.	Tribe considering EMS services study feasability, at least of first responders positions. Currently it takes about an hour from the time of the call to be seen at a ER.	Enhance Alternative care services, adding to existing Massage Therapy services.	Secure Primary Care provider for 2 days per week	Review total available PC department space with what the plan projects.		Review total available denta department space with what the plan projects.	Review pharmacy space and compare with what plan projects	Secure needed administrative staffing	Monitor progress of Diagnostic Imaging need to target appropriate "on-line" date for x-ray services. Talk with other health directors about ways to support x-ray services	substance abuse at the Airway Heights location (better placement for this	Review partne for add (subst region s locate
Keller - Keller Health Station	Provide Family Practice Provider with ER experience	Provide Family Practice Nursing Support with ER support experience	Increase Behavioral Health Staff (esp. Alcohol and Substance Abuse counselors)	Provide Administrative Support: Information Management and Medical Records Staff	Provide Public Health Nursing Staff	Provide CHR staff	Provide WIC staff	Secure 24/7 EMS solution capable of eliminating 1.5 hour transfer time to hospital	Secure Tribal Health Administration staff.			
Klamath Tribal Health Center - Chiloquin*												

The Portland Area Health Services Master Plan PSA Resourcing Priorities - Top 15 Composite

Implementation by Simple Priority

List

12	13	14	15
Plan for Elder Care (What compnent of elder care are you planning?)	Add Dialysis Service	Add Substance Abuse After Care	Add Elder Care
Reception area	Shot room	Educational health classroom and meeting space	
Add Administrative staff and space	Provide Quality Management staff and space	Increase business office staff and space	Increase CHS staff and space
Add Administrative staff and space	Provide Quality Management staff and space	Increase business office staff and space	Increase CHS staff and space
Increase staff and space in Public Health Nutrition	Secure on site Pediatric Care	Provide Substance Abuse Transitional Care staff and space	Add additional optometrist and eye lanes
Provide case management	Provide security staff and space	Provide tribal health administration, WIC and Outreach Diabetes Staff	Provide wellness center
Review possibility of partnership with other tribes for adult residential care (substance abuse) in a regional center appropriately located.	Hire facility support staff.	Create PHN department staffing	Clarify staffing relationship/responsibilities of the health deparment to the new wellness conter (specifically the exercise room/areas)
