

EH Stage 1 and Stage 2 Performance Measures (for 2014 RPMS EHR Users)

Last updated on September 15, 2014

Objective	2014 Stage 1 Measure	Stage 2, 2014+ Measure
Computerized Provider Order Entry (CPOE)	More than 30% of med (core)	More than 60% of med; more than 30% of lab; and more than 30% of radiology (core)
Drug to drug and drug to allergy interaction checks	Functionality enabled for entire reporting period Yes/No (core)	Incorporated into CDS measure
Record demographics	More than 50% (core)	More than 80% (core)
Problem list	More than 80% (core)	Incorporated into Summary of Care
Medication list	More than 80% (core)	Incorporated into Summary of Care
Allergy list	More than 80% (core)	Incorporated into Summary of Care
Vital signs	More than 50%, BP recorded (for patients age 3 and older), and height and weight recorded (for all ages) (core)	More than 80%, BP recorded (for patients age 3 and older), and height and weight recorded (for all ages) (core)
Smoking status	More than 50% (for patients age 13 and older) (core)	More than 80% (for patients age 13 and older) (core)
Clinical Decision Support (CDS)	Implement 1 clinical decision support rule Yes/No (core)	1. Implement 5 CDS interventions related to 4 or more CQMs. 2. Functionality enabled for drug-drug and drug-allergy interaction checks (Yes/No) (core)
Patient Electronic Access (View Online, Download and Transmit Health Information)	More than 50% are provided online access to their health information within 36 hours of discharge (core)	1. More than 50% are provided online access to their health information within 36 hours of discharge 2. More than 5% view, download, or transmit their health information to a third party (core)
Protect electronic health information (Security Risk Analysis (SRA))	Conduct or review SRA and implement necessary updates Yes/No (core)	Conduct or review SRA including addressing the encryption/security of data stored in CEHRT, and implement updates as necessary Yes/No (core)
Electronic Medication Administration Record (eMAR)	N/A	More than 10% of med orders tracked using eMAR (core)
Drug-formulary checks	Functionality enabled and access to at least 1 formulary for entire EHR reporting period Yes/No (menu)	Incorporated into the e-prescribing measure
Clinical lab test results	More than 40% of all clinical lab tests results (menu)	More than 55% of all clinical lab tests (core)
Patient lists	Generate at least 1 report Yes/No (menu)	Generate at least 1 report Yes/No (core)
Patient-specific education resources	More than 10% of all unique patients are provided patient-specific education resources (menu)	More than 10% of all unique patients provided patient-specific education resources (core)
Medication reconciliation	Med rec for more than 50% of transitions of care (menu)	Med rec for more than 50% of transitions of care (core)
Summary of Care (Transition of care)	Summary of care record for more than 50% of transitions of care and referrals (menu)	1. Provides a summary of care record for more than 50% of transitions of care and referrals

EH Stage 1 and Stage 2 Performance Measures (for 2014 RPMS EHR Users)

Last updated on September 15, 2014

Objective	2014 Stage 1 Measure	Stage 2, 2014+ Measure
		2. Provides a summary of care record provided using electronic transmission through CEHRT eHealth exchange for more than 10% for transitions of care and referrals 3. At least 1 summary of care record must be transmitted electronically to a recipient with a different EHR vendor or to the CMS test EHR (core)
Advance directives	More than 50% (for unique patients 65 and older) (menu)	More than 50% (for unique patients 65 and older) (menu)
Immunization registries	Perform at least 1 test Yes/No (menu)	Successful ongoing submission for the entire EHR reporting period (core)
Syndromic surveillance	Perform at least 1 test Yes/No (menu)	Successful ongoing submission for the entire EHR reporting period (core)
Reportable lab results	Performed at least 1 test Yes/No (menu)	Successful ongoing submission for the entire EHR reporting period (core)
Imaging	N/A	More than 10% of all scans and tests accessible through CEHRT (menu)
Discharge eRX	N/A	More than 10% of hospital discharge meds are queried for a drug formulary and transmitted using CEHRT (menu)
Electronic notes	N/A	Enter at least 1 for more than 30% of unique patients (menu)
Family history	N/A	More than 20% of all unique patients have a structured data entry for 1 or more first-degree relatives or an indication that family health history has been reviewed (menu)

*Inpatient and ER departments are defined as POS 21 and 23.
