

RPMS Behavioral Health System

Version 4.0 Patch 13 Release Announcement

October 2026

The Indian Health Service Office of Information Technology and the Division of Behavioral Health announce the following application release:

- Behavioral Health System Version 4.0 Patch 13 (RPMS namespace: AMH).

A release notice from the IHS Office of Information Technology has been sent to all RPMS site managers, and site managers are advised to notify users once the application has been installed. Complete details of the modifications in this release are included in the official Installation Guide or Notes file.

Thank you to our beta sites, California District Area Office, Desert Visions Youth Wellness Center, and South Dakota Urban Indian Health, Inc. for their assistance with this release.

Overview of Changes:

1. Added the ability to document co-signatures when signing individual visits and group visits in AMH GUI.
2. Updated the American Psychiatric Association's (APA) DSM-5-TR code set.
3. Modifications to Individual Visit Data Entry: Modified the visit entry interface to support multiple Placement Dispositions and corresponding Placement Names within a single visit. This update also streamlines health factor data entry for a more user-friendly workflow and updates the behavior of the suicide pop-up prompted by suicide diagnostic codes.
4. Screening reports for depression, alcohol, and drug use now correctly display the provider in GUI and Roll and Scroll.
5. Age Categories added to SSR Suicide Reporting Form.
6. Test/Prod Flag in Outgoing Messages to indicate Test or Production database.
7. AMH modified to use BCOM instead of sendTo to address security vulnerability.

IMPORTANT NOTES:

Before installing this patch, please review the installation guide completely as sites must complete all Pre- and Post- installation steps as outlined.

BCOM Pre-Install Checklist

1. Identify the export directory/folder path.
2. List the contents of the export directory

3. Check for a folder named "archive". If the folder does not exist, one must be created.
4. Install global build file followed by installation of the KIDS file

BCOM Post-Install Checklist for system administrator with IRIS management portal access

1. Verify that two new BCOM processes (GetAMH and SendAMH) have been created.
2. Check process SendAMH settings to make sure the export folder path is the same as what is identified in RPMS SITE file
3. Check process GetAMH settings to ensure “archive” folder path is set correctly as identified during pre-install
4. Ensure all AMH export files have been uploaded to NDW.
 - Optional: If desired, sites can open a Service Now ticket addressed to NPIRS to be added to receive confirmation emails from NPIRS.

Student/Supervisor RPMS set up

1. Set up cosigner for Student/Supervisor assignments

Edit View/Update CO-Signature Data for Provider/Student requiring Co-Signatures with their approved Co-Signers. Use the AMHS > MUTL > COSG menu path.

Estimated Install Time: < 30 Minutes

Additional Information:
