Dialectical Behavior Therapy Overview

Shawn S. Sidhu, M.D., F.A.P.A.

Question

- Why was Dialectical Behavior Therapy originally created?
- A) Borderline Personality Disorder
- B) Impulsivity
- C) Bipolar Disorder
- D) Suicidality
- E) Major Depressive Disorder

Answer

Α

Linehan's original work looked specifically at suicidality, and then it was expanded to Borderline Personality Disorder.

Why Should You Care About DBT?

We are ineffective at predicting which patients will end up harming themselves

A history of *IMPULSIVE* aggression remains the best predictor of suicide attempts

DBT is one of the only treatments which directly addresses impulsivity

Authentic, genuine, and customized. Also semistructured.

Multiple simultaneous components addressing separate but important issues

Can expand for use in anyone with impulsive behaviors (including substance abuse)

What is DBT? What is a Dialectic?

Question 2

Which of the following thinking patterns is reflective of a "dialectic"?

- 1) <u>Persistently negative (everything is terrible and always will be)</u>
- 2) <u>Catastrophizing</u> (the fact that I am late for this meeting will ruin my whole life)
- 3) <u>Black and White (my husband is perfect and my mother-in-law has</u> no redeemable qualities)
- 4) <u>Paranoia</u> (my family wants to cook for me so that they can put something in my food)
- 5) <u>Distorted Thinking</u> (I know I am normal weight but when I look in the mirror all I see is someone who is grotesque)

Answer

<u>Black and White (my husband is perfect and my</u> mother-in-law has no redeemable qualities)

The other types of thinking could also be possible in DBT patients as well!

Dialectics refer to opposing/conflicting ideas

"Black and White" thinking is a hallmark of impulsive individuals

The point of DBT is to help patients see things objectively and less extremely, and to help see the truths in both sides

DBT started out as a therapy aimed at addressing dialectics, but really has moved to addressing many extremes in thinking

Examples of Extreme Thinking

Independent Self-View: "I'm worthless" or "Everything in my life sucks and it always will"

Interpersonal Self-View: "Everybody hates me"

View of Others: "My mom is the worst person in the world"

Interpretation: "My dad criticized the way I was cleaning so he doesn't love me, his live would be easier without me, and I should kill myself"

What Are the Components of DBT?

Question 3

What are the components of DBT?

- A) Individual Therapy/Phone Coaching
- B) Skills Groups
- C) Consultation Groups
- D) Family Therapy
- E) All of the Above

Answer

All of the Above

DBT Structure

Individual Therapy: 1 hour per week

Phone Coaching

Skills Group: 2-2.5 hour group per week

Family Therapy/Involvement

Consultation Group: 1.5 – 2 hour group per week

*None of these components have been shown to be efficacious in the absence of the others

Individual Therapy Skills/Tools

Question 4

What method do DBT therapists use in individual therapy when a patient endorses recent cutting?

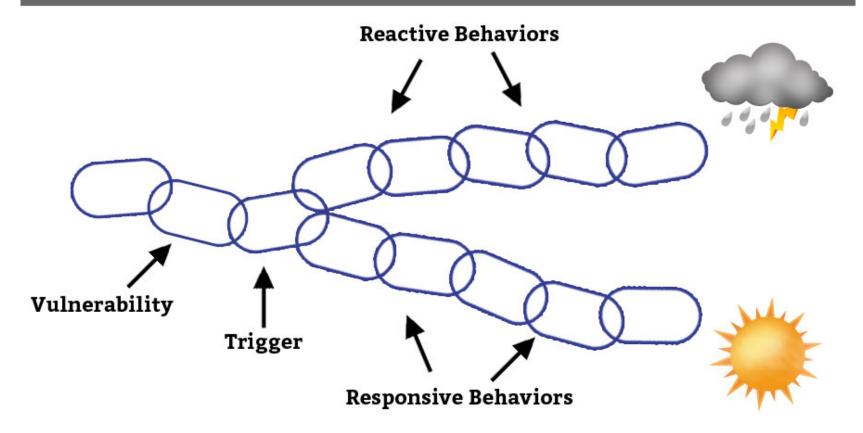

- A) Cognitive Restructuring
- B) Exposure-Response Prevention
- C) Habit Reversal Training
- D) Behavior Chain Analysis
- E) Insight-Oriented Interpretation

Answer

Behavioral Chain Analysis

Behavioral Chain Analysis

DBT Chain Analysis

©2002, Marcia Linehan. Graphic by Jaelline Jaffe, PhD

- 1) Describe the specific PROBLEM BEHAVIOR (example cutting or a suicide attempt)
 - A) Be very specific and detailed. Avoid vague terms.
 - B) Identify exactly what you did, said, thought, or felt
 - C) Describe the intensity of the behavior and other characteristics of the behavior that are important
 - D) Describe the problem behavior in enough detail that an actor in a play or movie could recreate the behavior exactly

2) Describe the specific PRECIPITATING EVENT that started the whole chain

A) Identify the environmental event that started the chain. Always start with some event in your environment, even if it doesn't seem to you that the environmental event caused the problem behavior. Here are some possible questions to get to this:

1) When did the sequence of events that led to the problem behavior begin? When did the problem start?

2) What was going on the moment the problem started?

3) What were you doing, thinking, feeling, and imagining at the time?

4) Why did the problem behavior happen on that day instead of the day before?

3) Describe the VULNERATBILITY FACTORS happening before the precipitating event. What factors or events made you more vulnerable to a problematic chain? Areas to examine include the following:

A) Physical illness, unbalanced eating or sleeping, injury

- B) Use of drugs or alcohol, misuse of prescription drugs
- C) Stressful events in the environment (positive or negative)
- D) Intense emotions, such as sadness, anger, fear, or loneliness
- E) Previous behaviors of your own that you found stressful

4) Describe in excruciating detail the CHAIN of EVENTS that led up to the problem behavior

* Imagine that your problem behavior is chained to the precipitating even tin the environment. How long is the chain? Where does it go? What are the links? Write out all links in the chain of events, no matter how small. Be very specific, as if you are writing a script for a play.

A) What exact thought (or belief), feeling, or action followed the precipitating event? What thought, feeling, or action followed that? What next? What next?

B) Look at each link in the chain after you write it. Was there another thought, feeling, or action that could have occurred? Could someone else have thought, felt, or acted differently at that point. If so, explain how that specific thought, feeling or action came to be.

C) For each link in the chain, ask yourself: is there a smaller link I could describe?

5) What were the CONSEQUENCES of this behavior? Be specific. How did other people react immediately and later? How did you feel immediately following the behavior? How about later? What effect did the behavior have on you and your environment?

6) Describe in detail different SOLUTIONS to the problem

A) Go back to the chain of your behaviors following the prompting event. Circle each point or link where, if you had dome something different, you would have avoided the problem behavior

B) What could you have done differently at each link in the chain of the events to avoid the problem behavior? What coping behaviors or skillful behaviors could you have used?

7) Describe in detail a PREVENTION STRATEGY for how you could have kept the chain from starting by reducing your vulnerability to the chain.

8) Describe what you are going to do to REPAIR important or significant consequences of the problem behavior

DIALECTICAL BEHAVIOR THERAPY WITH SUICIDAL ADDIES

164

Vulnerability: Conflicts with boyfriend and best friend; impaired sleep.

> Prompting event: Father refused to grant a previous request; mother criticized her dishwashing.

Links: Emotion: Sadness. Thought: "No one loves me any more." Consequences: Negative reinforcement: Experienced emotional relief. Positive reinforcement: Mother and boyfriend lavished her with love and affection after suicide attempt.

Problem betranin

Suicide attem

herself with m

FIGURE 8.2. Behavioral chain analysis of Jessica's suicide attempt.

Vulnerability: Conflicts with boyfriend and best friend; impaired sleep.

Provide didactic instruction on sleep hygiene

> Prompting event: Father refused to grant a previous request; mother criticized her dishwashing.

Teach skills: Mindfulness, distress tolerance. Links: Emotion: Sadness. Thought: "No one loves me any more."

Conduct (1) exposure to sadness and (2) cognitive restructuring. Consequences: Negative reinforcement: Experienced emotional relief. Positive reinforcement: Mother and boyfriend lavished her with love and affection after suicide attempt.

Problem behavior

Suicide attempt:

herself with razont we

Explain principles of reinforcement to client and family members. Obtain commitment to practice reinforcing prosocial behaviors and extinguishing maladaptive behaviors.

FIGURE 8.3. Solution analysis of Jessica's suicide attempt.

SKILLS GROUPS

Dialectical Behavior Therapy

PROBLEMS (What to decrease)

- Confusion about yourself (Not always knowing what you feel or why you get upset; dissociation)
- II. Impulsivity (Acting without thinking it all through)
- III. Emotional instability (Fast, intense mood changes with little control; or, steady negative emotional state)
- IV. Interpersonal problems (Pattern of difficulty keeping relationships steady, getting what you want, or keeping your selfrespect; frantic efforts to avoid abandonment)

 V. Teenager-family dilemmas (Polarized thinking, feeling, and acting-e.g., all-or-nothing thinking) SKILLS (What to increase)

- I. Mindfulness
- II. Distress tolerance
- III. Emotion regulation
- IV. Interpersonal effectiveness

V. Walking the middle path

Adapted by permission from Linehan (1993a). Copyright 1993 by The Guilford Press. Adapted in *Dialectical Belanter Therapy with Suicidal Adolescents* by Alec L. Miller, Jill H. Rathus, and Marsha M. Linehan. Permission to copy this figure is granted to purchasers of this book for personal use only (see copyright page for details).

FIGURE 7.1. Handout on DBT for adolescents and family members.

Question 5

- Which of the following could be considered a "mindfulness" exercise?
- A) Creating a fear ladder/hierarchy
- B) Taking a walk while noting the sights
- C) Directly addressing uncomfortable emotions
- D) Distracting the mind from negative thoughts
- E) Providing gentle aversive therapy to maladaptive behaviors

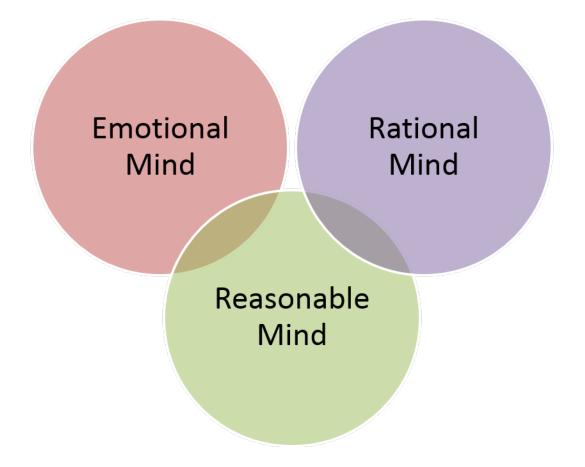

Answer

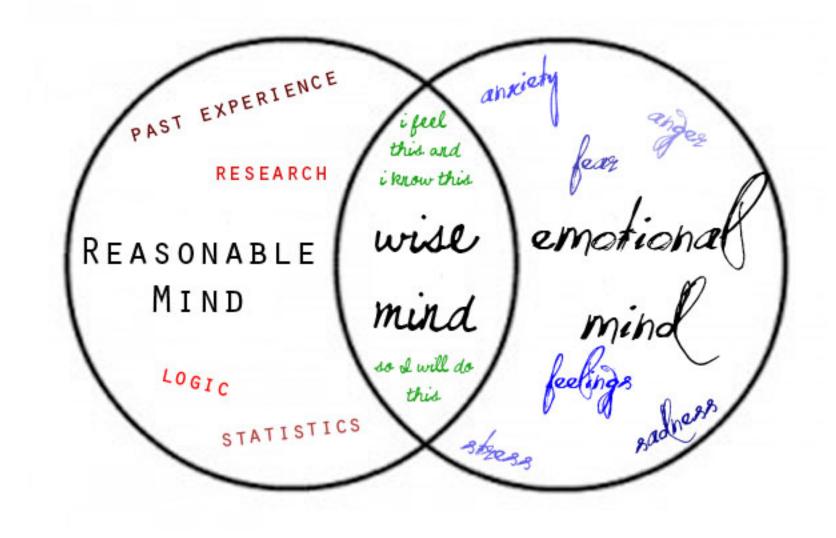

MINDFULNESS

Mindfulness Training

- Overarching Philosophy: help patients be more in touch with themselves and their environments in the moment
- 3 States of the Mind
- What Skills
- How Skills

Mindfulness - 3 States of the Mind

Mindfulness - "What" Skills

- Observe
- Describe
- Participate

Mindfulness

Three Steps to Achieve Wise Mind: "What" Skills

OBSERVE

- Just notice the experience in the present moment.
- Wordless watching: Watch your thoughts and feelings come and 0 go, as if they are on a conveyor belt. Don't push away your thoughts and feelings. Just let them
- happen, even when they are painful.
- Observe both inside and outside yourself.

DESCRIBE

- Wordful watching: Label what you observed with words. Put words on the experience—for example, "I feel sad," or "My
- heart is pounding." Describe only what you observe (without interpretations).

PARTICIPATE

- Try not to worry about tomorrow or focus on yesterday. Throw yourself into the present moment fully (e.g., dancing, cleaning, taking a test, feeling sad in the moment).
 - Fully experience your feelings without being self-conscious.
 - Listen to your WISE MIND to help you choose to participate (a your discomfort; (b) in an alternate activity to escape/avoid
 - distress; or (c) in order to experience life fully. Remember to use your "HOW" SKILLS while participating.

From Dialectical Behavior Therapy with Suicidal Adolescents by Alec L. Miller, Jill H. Rathus, and M Linehan. Copyright 2007 by The Guilford Press. Permission to photocopy this figure is granted to purchas book for personal use only (see copyright page for details).

FIGURE 10.2a. Example of an adapted skills handout for adolescents.

Mindfulness - "How Skills"

• Non-Judgementally

• One Mindfully

• Effectively

DISTRESS TOLERANCE

Distress Tolerance

- Learn Crisis Survival Skills. Core skills include:
 - Self-Soothing Skills
 - Improve the Moment
 - Learn to Evaluate Pros and Cons
 - Distract Yourself with <u>ACCEPTS</u>
- Other Skills Include:
 - Breathing Exercises
 - Half-Smiling Exercises
 - Turning the Mind/Radical Acceptance/Accepting Reality

Distress Tolerance – Distraction (ACCEPTS)

- Activities:
- contributing:
- comparisons:
- Emotions:
- Pushing Away:
- Thoughts:
- sensations:

INTERPERSONAL EFFECTIVENESS

Interpersonal Effectiveness

- Keeping Relationships with <u>GIVE</u>
- Keeping Self-Respect with <u>FAST</u>
- Getting What you Want with <u>DEAR MAN</u>
- Factors Reducing Interpersonal Effectiveness
- Self-Affirming Statements for Interpersonal Effectiveness
- Looking into Asking for What You Want/Saying No

GIVE and FAST

- be <u>Gentle</u>
- act interested
- <u>v</u>alidate
- use an <u>Easy manner</u>
- be <u>F</u>air
- no <u>A</u>pologies
- <u>stick to your values</u>
- be <u>⊤</u>ruthful

DEAR MAN

- <u>D</u>escribe
- <u>Express</u>
- <u>A</u>ssert
- <u>R</u>einforce
- stay <u>м</u>indful
- <u>Appear confident</u>
- <u>N</u>egotiate

EMOTIONAL REGULATION

Emotion Regulation

- Reducing vulnerability to negative emotions via PLEASE MASTER
- Letting go of emotional suffering
- Mindfulness of the current emotion
- Changing emotions by acting opposite to the current emotion
- Steps for increasing positive emotions

PLEASE MASTER

- <u>Physica</u> illness
- balance <u>Eating</u>
- <u>Avoid mood-Altering drugs</u>
- balance <u>sleep</u>
- get <u>Exercise</u>
- become a <u>MASTER</u>/build <u>MASTER</u>y
