

LET'S REACH COMMUNITY IMMUNITY!

# PROTECT

YOURSELF. YOUR FAMILY. YOUR ELDERLY.

GET VACCINATED

## COVID-19 Vaccines: Four Reasons Why Vaccines Make Sense

The CDC has approved COVID-19 vaccines for anyone age 5 and older. This expansion allows everyone in the family to receive a vaccine and further protect our communities. Here are the top four reasons to get vaccinated today.

### 1: Vaccines protect our elders.

Not all elders can be vaccinated, so increasing the number of vaccinated people around them lowers their chances of getting COVID-19.

### 2: Vaccines help communities reopen.

While every location is different, many event venues, schools, and churches are requiring vaccination documentation for those attending events. Having your card means you can start going back to the things you love.

### 3: Vaccines keep you out of the hospital.

While no vaccine guarantees you won't get sick with COVID-19, we know it may keep people from having severe cases requiring hospitalization.

### 4: Vaccines are the way to "beat" the pandemic.

We beat diseases that once plagued citizens, like polio, because an entire generation received their vaccines. Now, it's our turn to do the same thing to beat COVID-19.

**Remember, you are the best resource to teach families why the vaccine is so important.**
